Clue G-Cloud Pricing

Part 2 – Onboarding Services

- £1,350 per day
- Project management and governance
- Project kick-off
- Configuration support
- Simple data import*
- Technical and architecture support
- Admin, super user and end-user training
- Go live support and transition to BAU
- Does not include travel expenses

**Simple data import means from one source, cleansed by the customer and mapped to the Clue import template*

Part 3 – Onboarding Notes

We can scope and provide a fixed price upfront for all the above.

We typically expect smaller teams and less complex projects to require fewer service days.

As user numbers increase, organisations tend to have multiple teams to onboard and need more of our time on configuration, training, and data import services.

This is what to expect depending on team size:

- Teams of up to 50 users: 20 days.
- Teams of between 50 and 200 users: 30 days
- Teams of 200+ users: 50 days

If you have technically complex projects, such as integration or complex data migration requirements, you may need more time to support these.
