

Pricing Template for G Cloud 15

The EMPACTIS platform consists of these modules:

- Org Manager
- Absence Manager
- HR Case Manager
- Health Manager
- Insights

Each module has numerous configuration options, including the capability for customised workflows, online forms, notifications and integrations with 3rd party software.

Pricing is based on the volume of employees and which modules and configuration options are chosen. A simple short discussion with a client is usually enough to firm up the pricing.

The system unit costs range from £7 per employee per year to £35 per employee per year, excluding VAT and includes all support and maintenance costs. Any combination of modules is possible or just one can be used.

Org Manager and Insights are free to any G-Cloud user who buys Absence Manager, HR Case Manager or Health Manager.

All prices include:

- Telephone and email support
- All system upgrades
- For NHS clients – an ESR integration is available (one-off fee)
- Set up charges (one-off fee) depend on the options chosen and scale of the implementation.
- Additional costs for HR/Payroll integration, Single Sign-on and other 3rd party integrations.
