

Janet Cloud Connect Pricing

We offer a free of charge consultation, typically through a scoping call, to capture your requirements for the Janet Cloud Connect service.

Pricing is highly bespoke and dependent upon your choice of solutions provider, the volume of traffic you anticipate into and out of the cloud, and so the resulting bandwidth requirement. Also, your geographical location(s), pre-existing connectivity, required level of resilience and service availability in your area. We will take all these factors into consideration in finding the best match for your requirements that can be scaled as your needs change over time.

The heavily bespoke nature of Janet Cloud Connect means we can only indicate the fixed elements of our prices:

Connection Speed	Bearer Speed	One-off set-up charge	Annual charge
100Mbps	1Gbps	£1,172.60	£3,157.70
100Mbps	1Gbps	£1,172.60	£4,891.90
1Gbps	1Gbps	£1,172.60	£5,938.40
1Gbps	10 Gbps	£3,312.40	£9,326.20
10 Gbps	10 Gbps	£3,312.40	£30,947.80

Prices may be subject to site-specific excess construction and/or distance charges.

Ancillary services

10 Gbit/s	£4,273	£7,731	£92,774

Prices excludes VAT.

These prices are for the Jisc element of an ExpressRoute Circuit which carries user traffic over the Janet network to an ExpressRoute peering location. They are in addition to the amount directly charged to organisations, by Microsoft, for the Microsoft element of the circuit between the peering location and the Azure platform. Charges levied directly to organisations, by Microsoft, for the user of the Azure platform itself, including virtual machines, storage, cloud services etc. are completely separate from ExpressRoute charges.

For Microsoft Azure pricing, including the Microsoft element of ExpressRoute Circuits please visit azure.microsoft.com.
