

G-Cloud 15 Service Description

Data Engineering & AI Platform Delivery Services

SERVICE OVERVIEW

Data Engineering & AI Platform Delivery Services

Ometis delivers cloud data engineering and AI platform delivery services to design, build and optimise modern data platforms. We support organisations to implement scalable data pipelines, models and AI-ready architectures, enabling reliable analytics, machine learning and AI use cases across cloud data platforms.

Service Features

1. Cloud data engineering and platform delivery services
2. Design and build of scalable data pipelines
3. Data modelling and transformation for analytics and AI
4. AI-ready data platform and architecture implementation
5. Snowflake, Databricks and Microsoft Fabric delivery services
6. Data quality, stewardship and validation implementation
7. Performance, cost and reliability optimisation for data platforms
8. Secure data access and platform configuration
9. Migration and modernisation of existing data pipelines
10. Testing, validation and knowledge transfer to upskill internal teams

Service Benefits

1. Delivers scalable, reliable data platforms for analytics and AI
2. Enables faster access to trusted, high-quality data
3. Supports AI and machine learning initiatives
4. Improves performance and cost efficiency of data platforms
5. Reduces technical debt through modern data engineering practices
6. Improves data quality for downstream analytics and AI use cases
7. Accelerates delivery of data-driven initiatives
8. Supports secure, governed data platform usage
9. Builds internal data engineering capability through knowledge transfer
10. Aligns data platforms with organisational priorities and outcomes

25 years experience

250+ UK customers

Vendor-agnostic approach

SERVICE DELIVERY

Delivery Approach:

Services are delivered using a simple, structured approach:

1

Understand

Confirm data engineering requirements, platforms, constraints, and AI readiness.

2

Deliver

Build data pipelines, integrations, transformations, and AI-ready data architectures.

3

Assure

Validate performance, data quality, and operational readiness and complete knowledge transfer

Service Scope

Included

- Data pipelines and integrations
- Transformations and analytics engineering
- AI-ready platform architectures
- Documentation and knowledge transfer

Excluded

- Managed platforms or services (procured separately)
- Analytics and dashboard delivery (procured separately)
- Software licensing or resale (procured separately)
- Training services (procured separately)

Service Constraints

Services can be delivered remotely or onsite. Remote delivery is available as standard. Where onsite delivery is requested, reasonable travel and subsistence costs may apply and will be agreed in advance as part of the call-off arrangement. Delivery schedules and locations are confirmed during mobilisation.

Security and Compliance

The service is delivered in line with G-Cloud framework requirements and buyer policies. Appropriate staff screening is applied. Any buyer-specific security, access or data handling requirements are agreed at call-off.

Ordering and Onboarding

The service is ordered via a G-Cloud call-off agreement. During onboarding, Ometis works with the buyer to confirm service scope, delivery approach, pricing, schedule and logistics prior to delivery commencing.

Service Management

Delivery is managed through agreed points of contact and delivery plans. Progress is monitored, issues are addressed as required, and service completion is confirmed at the end of the engagement.

WHAT WE DO

25 years experience

250+ UK customers

Vendor-agnostic approach

HOW WE WORK

Our Proven Process balances strategic planning, practical delivery and continuous improvement.

It's based on 25 years delivering data solutions for 250+ UK customers and tailored to your needs.

1

Understand "Define the journey"

Before any delivery begins, we listen to your goals and challenges, understand how your data, systems, and teams work, and align everyone on what success looks like.

This ensures we're solving the right problem.

2

Deliver "Govern the work"

We design and build solutions that fit your needs and constraints, keeping delivery controlled and transparent throughout.

Training and adoption support are built in, so your teams understand and use what's being delivered.

3

Assure "Realise the value"

We review what's been built against your original goals and make sure the solution is stable, secure and understood.

Whether you continue independently or with our ongoing support, you're in a strong position to maintain and improve it.

WHY TRUST US

**We help businesses get more value from their data
through great technology, true expertise, and fast ROI.**

We've been doing this for 25 years for more than 250 organisations.

We work with Qlik, Snowflake, Microsoft, Databricks, dbt, Jedox, Inphinity, and more. If something else fits your needs better, we'll tell you upfront.
