

G-Cloud 15 Service Description

Data & AI Readiness and Roadmapping

SERVICE OVERVIEW

Data & AI Readiness and Roadmapping

Ometis helps organisations assess readiness for cloud-based analytics, AI, and advanced data use. We evaluate data maturity, skills, platforms, and governance, identify high-value opportunities, and define practical roadmaps. The service ensures AI and analytics ambitions are achievable, responsible, and aligned to cloud capabilities and organisational readiness.

Service Features

1. Assessment of data, analytics, and AI maturity and readiness
2. Skills, capability, and organisational gap analysis
3. Assessment of cloud platform suitability for analytics and AI workloads
4. Identification of viable AI and advanced analytics opportunities
5. Review of data quality, governance, and control readiness
6. Consideration of ethical, responsible, and compliant AI use
7. Prioritised and sequenced analytics and AI roadmap
8. Identification of delivery dependencies, risks, and constraints
9. Alignment of analytics and AI plans with cloud migration strategy
10. Clear, evidence-based recommendations and defined next steps

Service Benefits

1. Improves confidence in analytics and AI investment and adoption decisions
2. Prevents premature or unrealistic analytics and AI initiatives
3. Supports responsible and ethical, governed adoption of analytics and AI
4. Aligns analytics and AI ambitions with organisational maturity and readiness
5. Prioritises analytics and AI initiatives based on achievability and value
6. Reduces delivery risk through clear planning and sequencing
7. Builds shared understanding across diverse stakeholder groups
8. Supports building of sustainable internal analytics and AI capability
9. Ensures long-term value from analytics and AI investments
10. Creates a clear, achievable roadmap from strategy to delivery

25 years experience

Vendor-agnostic approach

SERVICE DELIVERY

Delivery Approach:

Services are delivered using a simple, structured approach:

1

Understand

Confirm organisational objectives, decision context, data maturity, constraints, and AI readiness

2

Deliver

Assess current capabilities, identify opportunities, risks, and dependencies, and define roadmap options.

3

Assure

Validate recommendations, confirm feasibility, and support confident, evidence-based decisions.

Service Scope

Included

- Data and AI capability and maturity assessment
- Architecture and delivery options analysis
- Roadmap, sequencing, and prioritization
- Governance and operating model recommendations
- Structured knowledge transfer

Excluded

- Software licensing or product resale (procured separately)
- Bespoke software development
- Long-term managed services

Service Constraints

Services can be delivered remotely or onsite. Remote delivery is available as standard. Where onsite delivery is requested, reasonable travel and subsistence costs may apply and will be agreed in advance as part of the call-off arrangement. Delivery schedules and locations are confirmed during mobilisation.

Security and Compliance

The service is delivered in line with G-Cloud framework requirements and buyer policies. Appropriate staff screening is applied. Any buyer-specific security, access or data handling requirements are agreed at call-off.

Ordering and Onboarding

The service is ordered via a G-Cloud call-off agreement. During onboarding, Ometis works with the buyer to confirm service scope, delivery approach, pricing, schedule and logistics prior to delivery commencing.

Service Management

Delivery is managed through agreed points of contact and delivery plans. Progress is monitored, issues are addressed as required, and service completion is confirmed at the end of the engagement.

WHAT WE DO

25 years experience

250+ UK customers

Vendor-agnostic approach

HOW WE WORK

Our Proven Process balances strategic planning, practical delivery and continuous improvement.

It's based on 25 years delivering data solutions for 250+ UK customers and tailored to your needs.

1

Understand "Define the journey"

Before any delivery begins, we listen to your goals and challenges, understand how your data, systems, and teams work, and align everyone on what success looks like.

This ensures we're solving the right problem.

2

Deliver "Govern the work"

We design and build solutions that fit your needs and constraints, keeping delivery controlled and transparent throughout.

Training and adoption support are built in, so your teams understand and use what's being delivered.

3

Assure "Realise the value"

We review what's been built against your original goals and make sure the solution is stable, secure and understood.

Whether you continue independently or with our ongoing support, you're in a strong position to maintain and improve it.
