

G-Cloud 15 Service Description

Data Platform Set-up & Migration

SERVICE OVERVIEW

Data Platform Set-up & Migration

Ometis designs, builds, and migrates cloud data platforms and analytics foundations. We audit data, design structures, manage mobilisation, and support delivery governance to ensure secure, scalable, and reliable platforms. The service enables organisations to move data and analytics workloads to the cloud with reduced risk and minimal disruption.

Service Features

1. Cloud data platform setup and migration delivery services
2. Implementation of data ingestion, transformation, and analytical modelling
3. Secure platform configuration aligned to governance and compliance requirements
4. Migration of existing data, analytics, and reporting workloads
5. Testing, validation, and quality assurance to support stable cutover
6. Performance, reliability, and cost optimisation during migration delivery
7. Security, identity, and access controls embedded throughout implementation
8. Mobilisation and coordination supporting a controlled delivery start-up
9. Knowledge transfer and structured handover supporting self-sufficient internal teams
10. Clear documentation supporting ongoing platform operation and support

Service Benefits

1. Delivers secure, stable cloud data platforms ready for analytics use
2. Embeds security, data governance, and compliance from the outset
3. Improves confidence in data platform reliability and performance
4. Minimises service disruption during complex data and analytics migration activities
5. Reduces technical debt, rework, and long-term maintenance overhead
6. Improves data quality, consistency, and trust in analytics outputs
7. Accelerates time to insight following platform migration and stabilisation
8. Establishes scalable analytics foundations for future growth and demand
9. Supports future analytics, AI, and advanced use cases without re-platforming
10. Enables a smooth, controlled transition into BAU operational support

25 years experience

Vendor-agnostic approach

SERVICE DELIVERY

Delivery Approach:

Services are delivered using a simple, structured approach:

1

Understand

Confirm platform scope, migration goals, constraints, dependencies, and risk profile.

2

Deliver

Design and build cloud data platforms and migrate data, analytics, and workloads.

3

Assure

Validate migration outcomes, platform stability, and operational readiness.

Service Scope

Included

- Cloud data platform build and configuration
- Migration of data, analytics, and reporting workloads
- Security, governance, and access configuration
- Testing, validation, and quality assurance
- Documentation and structured handover

Excluded

- Software licensing or product resale (procured separately)
- Long-term managed support services (procured separately)
- Training services (procured separately)
- Business-as-usual operational support (procured separately)

Service Constraints

Services can be delivered remotely or onsite. Remote delivery is available as standard. Where onsite delivery is requested, reasonable travel and subsistence costs may apply and will be agreed in advance as part of the call-off arrangement. Delivery schedules and locations are confirmed during mobilisation.

Security and Compliance

The service is delivered in line with G-Cloud framework requirements and buyer policies. Appropriate staff screening is applied. Any buyer-specific security, access or data handling requirements are agreed at call-off.

Ordering and Onboarding

The service is ordered via a G-Cloud call-off agreement. During onboarding, Ometis works with the buyer to confirm service scope, delivery approach, pricing, schedule and logistics prior to delivery commencing.

Service Management

Delivery is managed through agreed points of contact and delivery plans. Progress is monitored, issues are addressed as required, and service completion is confirmed at the end of the engagement.

WHAT WE DO

25 years experience

250+ UK customers

Vendor-agnostic approach

HOW WE WORK

Our Proven Process balances strategic planning, practical delivery and continuous improvement.

It's based on 25 years delivering data solutions for 250+ UK customers and tailored to your needs.

1

Understand "Define the journey"

Before any delivery begins, we listen to your goals and challenges, understand how your data, systems, and teams work, and align everyone on what success looks like.

This ensures we're solving the right problem.

2

Deliver "Govern the work"

We design and build solutions that fit your needs and constraints, keeping delivery controlled and transparent throughout.

Training and adoption support are built in, so your teams understand and use what's being delivered.

3

Assure "Realise the value"

We review what's been built against your original goals and make sure the solution is stable, secure and understood.

Whether you continue independently or with our ongoing support, you're in a strong position to maintain and improve it.
