

G-Cloud 15 Service Description

Analytics, Visualisation & AI Delivery Services

SERVICE OVERVIEW

Analytics, Visualisation & AI Delivery Services

Ometis provides cloud analytics, visualisation and AI-enabled delivery services to design, build and optimise analytics solutions. We support organisations to implement trusted reporting, dashboards and AI-assisted insights aligned to user needs, using modern cloud platforms and proven delivery approaches across a range of analytics and visualisation technologies.

Service Features

1. Analytics and visualisation solution design and delivery services
2. Dashboard, reporting and semantic model implementation
3. AI-assisted analytics and machine learning for insight generation
4. Qlik and Microsoft Power BI analytics delivery services
5. Advanced visualisation, modelling and analytics optimisation
6. Data preparation and transformation for analytics consumption
7. User-focused analytics design aligned to business requirements and user needs
8. Performance, usability and adoption optimisation for analytics platforms
9. Testing, validation and knowledge transfer of analytics solutions
10. Application of data analytics techniques to deliver wider organisational value

Service Benefits

1. Delivers trusted analytics and visualisations aligned to defined user needs
2. Accelerates access to actionable insights through effective data storytelling
3. Improves adoption of analytics platforms, dashboards, and reports
4. Enables AI-assisted insight generation and advanced analytical exploration
5. Improves decision-making through clear, consistent visualisation
6. Reduces rework through structured, repeatable analytics delivery practices
7. Identifies new insights using advanced analytics and exploratory techniques
8. Supports scalable, maintainable, and well-governed analytics solutions
9. Builds confidence in analytics outputs through transparency and quality controls
10. Aligns analytics delivery with organisational priorities and decision-making

25 years experience

250+ UK customers

Vendor-agnostic approach

SERVICE DELIVERY

Delivery Approach:

Services are delivered using a simple, structured approach:

1

Understand

Confirm analytics objectives, users, data sources, AI opportunities, and success criteria.

2

Deliver

Design and build dashboards, reports, semantic models, and AI-assisted analytics solutions.

3

Assure

Validate outputs, support adoption, and transfer knowledge to internal teams.

Service Scope

Included

- Analytics and dashboard delivery
- Visualisation and semantic modelling
- AI-assisted analytics and insights
- Quality assurance and documentation

Excluded

- Long-term managed analytics services (procured separately)
- Data engineering delivery (procured separately)
- Software licensing or resale (procured separately)
- Training services (procured separately)

Service Constraints

Services can be delivered remotely or onsite. Remote delivery is available as standard. Where onsite delivery is requested, reasonable travel and subsistence costs may apply and will be agreed in advance as part of the call-off arrangement. Delivery schedules and locations are confirmed during mobilisation.

Security and Compliance

The service is delivered in line with G-Cloud framework requirements and buyer policies. Appropriate staff screening is applied. Any buyer-specific security, access or data handling requirements are agreed at call-off.

Ordering and Onboarding

The service is ordered via a G-Cloud call-off agreement. During onboarding, Ometis works with the buyer to confirm service scope, delivery approach, pricing, schedule and logistics prior to delivery commencing.

Service Management

Delivery is managed through agreed points of contact and delivery plans. Progress is monitored, issues are addressed as required, and service completion is confirmed at the end of the engagement.

WHAT WE DO

25 years experience

250+ UK customers

Vendor-agnostic approach

HOW WE WORK

Our Proven Process balances strategic planning, practical delivery and continuous improvement.

It's based on 25 years delivering data solutions for 250+ UK customers and tailored to your needs.

1

Understand "Define the journey"

Before any delivery begins, we listen to your goals and challenges, understand how your data, systems, and teams work, and align everyone on what success looks like.

This ensures we're solving the right problem.

2

Deliver "Govern the work"

We design and build solutions that fit your needs and constraints, keeping delivery controlled and transparent throughout.

Training and adoption support are built in, so your teams understand and use what's being delivered.

3

Assure "Realise the value"

We review what's been built against your original goals and make sure the solution is stable, secure and understood.

Whether you continue independently or with our ongoing support, you're in a strong position to maintain and improve it.
