

G-Cloud 15 Service Description

Data & Analytics Migration Planning

SERVICE OVERVIEW

Data & Analytics Migration Planning

Ometis provides structured cloud data and analytics migration planning services. We assess current data, analytics, and operating capabilities, identify gaps, evaluate cloud options, and produce clear migration roadmaps. The service enables informed decisions, reduces delivery risk, and ensures cloud data initiatives align with strategic objectives and outcomes.

Service Features

1. Capability analysis across data, analytics, platforms, skills and governance
2. Cloud gap assessment covering analytics, reporting, AI readiness, technology maturity
3. Architecture options analysis with clear cost, benefit and delivery implications
4. Migration approaches aligned to organisational priorities, risks and constraints
5. Delivery roadmaps supporting phased, controlled analytics platform migration
6. Stakeholder engagement supporting shared understanding and delivery alignment
7. User transition and adoption planning aligned to phased migration approach
8. Security and data governance considerations embedded throughout migration planning
9. Clear, evidence-based recommendations supporting confident, accountable decision-making
10. Knowledge transfer supporting internal ownership of migration decisions

Service Benefits

1. Reduces migration risk through structured planning and governance
2. Identifies early value opportunities supporting phased, prioritised delivery decisions
3. Enables informed, evidence-based investment decisions with clear delivery implications
4. Improves confidence in delivery feasibility, sequencing and organisational readiness
5. Supports sustainable transition to cloud analytics platforms and operating models
6. Aligns technical migration plans with user impact and adoption considerations
7. Reduces disruption to users during analytics platform migration activities
8. Improves governance and assurance of analytics platform transition programmes
9. Builds internal understanding of migration implications and delivery responsibilities
10. Supports effective internal operational ownership following migration

Vendor-agnostic approach

SERVICE DELIVERY

Delivery Approach:

Services are delivered using a simple, structured approach:

1

Understand

Confirm organisational objectives, current data and analytics capabilities, operating context, constraints, and desired outcomes.

2

Deliver

Assess gaps, evaluate cloud options, and deliver prioritised, phased migration roadmaps aligned to organisational priorities.

3

Assure

Validate recommendations, confirm feasibility and readiness, and support confident, evidence-based migration decisions.

Service Scope

Included

- Capability analysis across data, analytics, platforms, skills and governance
- Cloud gap assessment including analytics, reporting and AI readiness
- Architecture options analysis with cost, benefit and delivery implications
- Migration approaches aligned to priorities, risks and constraints
- Phased migration roadmaps and sequencing
- Stakeholder engagement and alignment
- User transition and adoption planning
- Clear, evidence-based recommendations
- Knowledge transfer supporting internal ownership

Excluded

- Platform build, migration delivery or implementation (procured separately)
- Software licensing or product resale (procured separately)
- Long-term managed support services (procured separately)
- Training services (procured separately)
- Business-as-usual operational support (procured separately)

Service Constraints

Services can be delivered remotely or onsite. Remote delivery is available as standard. Where onsite delivery is requested, reasonable travel and subsistence costs may apply and will be agreed in advance as part of the call-off arrangement. Delivery schedules and locations are confirmed during mobilisation.

Security and Compliance

The service is delivered in line with G-Cloud framework requirements and buyer policies. Appropriate staff screening is applied. Any buyer-specific security, access or data handling requirements are agreed at call-off.

Ordering and Onboarding

The service is ordered via a G-Cloud call-off agreement. During onboarding, Ometis works with the buyer to confirm service scope, delivery approach, pricing, schedule and logistics prior to delivery commencing.

Service Management

Delivery is managed through agreed points of contact and delivery plans. Progress is monitored, issues are addressed as required, and service completion is confirmed at the end of the engagement.

WHAT WE DO

25 years experience

250+ UK customers

Vendor-agnostic approach

HOW WE WORK

Our Proven Process balances strategic planning, practical delivery and continuous improvement.

It's based on 25 years delivering data solutions for 250+ UK customers and tailored to your needs.

1

Understand "Define the journey"

Before any delivery begins, we listen to your goals and challenges, understand how your data, systems, and teams work, and align everyone on what success looks like.

This ensures we're solving the right problem.

2

Deliver "Govern the work"

We design and build solutions that fit your needs and constraints, keeping delivery controlled and transparent throughout.

Training and adoption support are built in, so your teams understand and use what's being delivered.

3

Assure "Realise the value"

We review what's been built against your original goals and make sure the solution is stable, secure and understood.

Whether you continue independently or with our ongoing support, you're in a strong position to maintain and improve it.
