

G-Cloud 15 Service Description

Qlik Cloud Analytics

Qlik Cloud Analytics

Reporting, dashboards, alerting, analytics, machine learning, artificial intelligence (AI) - Qlik provides a platform for organisations to gain more insight from data. Search and explore across all your data, instantly pivoting your analysis when new ideas surface. Harness machine-learning and automation powered by Qlik's cognitive engine on a multi-cloud platform.

Service Features

1. In-memory associative engine enabling unrestricted data exploration
2. Interactive dashboards, visualisations, and analytics in real time
3. Self-service analytics with governed enterprise controls
4. Advanced analytics, machine learning, and AI capabilities
5. Natural language search and conversational analytics
6. Mobile and browser-based analytical applications
7. Enterprise security, governance, and access management
8. Integrated location analytics with mapping and spatial insight capabilities
9. Alerts, subscriptions, and automated reporting distribution
10. Combine multiple data sources without predefined query paths

Service Benefits

1. Faster insight discovery through associative, interactive analytics
2. Self-service analytics within enterprise governance and security controls
3. Improved decision making across operational and strategic levels
4. Increased confidence in insights through consistent data governance
5. Reduced dependency on technical teams for analysis
6. Scalable analytics platform supporting organisation-wide adoption
7. Better understanding of trends, risks, and opportunities
8. Insights delivered proactively through alerts and subscriptions
9. Analytics accessible anywhere through secure cloud delivery
10. Future-ready analytics foundation supporting AI-driven insights

Qlik Cloud Analytics is provided as a secure, scalable cloud software service. Ometis supports onboarding, configuration, and enablement to ensure effective adoption and value realisation, aligned to buyer requirements and the G-Cloud call-off agreement.

25 years experience

250+ UK customers

Vendor-agnostic approach

Delivery Approach:

Services are delivered using a simple, structured approach:

1

Understand

Confirm buyer objectives, data sources, user groups, security requirements, and deployment preferences to ensure appropriate configuration and access.

2

Deliver

Provision and configure Qlik Cloud Analytics, enabling secure access to analytics, dashboards, reporting, automation, and AI-assisted insights across organisational data.

3

Assure

Confirm platform availability, security, governance controls, and user access. Support successful adoption through agreed onboarding and knowledge transfer activities.

Service Scope

Included

- Secure access to the Qlik Cloud Analytics software platform
- Self-service dashboards, visualisations, reporting, and alerting
- In-memory associative analytics for fast, exploratory data analysis
- AI-assisted analytics, natural language querying, and advanced insights
- GeoAnalytics and spatial analysis capabilities
- Governed, scalable cloud analytics with role-based access controls
- Browser-based and mobile access for organisational users
- Basic Support

Excluded

- Software development or custom application build
- Data engineering or platform migration delivery (available separately under Lot 3)
- Long-term managed services or operational support (unless separately procured)
- Bespoke analytics consultancy or strategy services
- End-user training beyond standard onboarding (available separately under Lot 3)
- Ongoing support beyond Basic (available separately under Lot 3)

Service Constraints

The service is delivered as a cloud-based software platform. Access requires compatible internet connectivity and supported browsers. Onsite services are not required for software provision.

Security and Compliance

Qlik Cloud Analytics is delivered in line with G-Cloud framework requirements and industry security standards. Data access, authentication, and governance controls are configurable. Any buyer-specific security or compliance requirements are agreed at call-off.

Ordering and Onboarding

The service is ordered via a G-Cloud call-off agreement. During onboarding, Ometis supports tenant setup, access configuration, and initial platform orientation as agreed.

Service Management

The software platform is maintained and updated by Qlik. Ometis provides agreed service management activities related to onboarding, configuration, adoption and basic support. Service completion is confirmed once access and configuration are established. Service delivery is managed through agreed points of contact and delivery plans. Progress is monitored throughout the engagement, and completion is confirmed following delivery of agreed outputs and knowledge transfer.

25 years experience

250+ UK customers

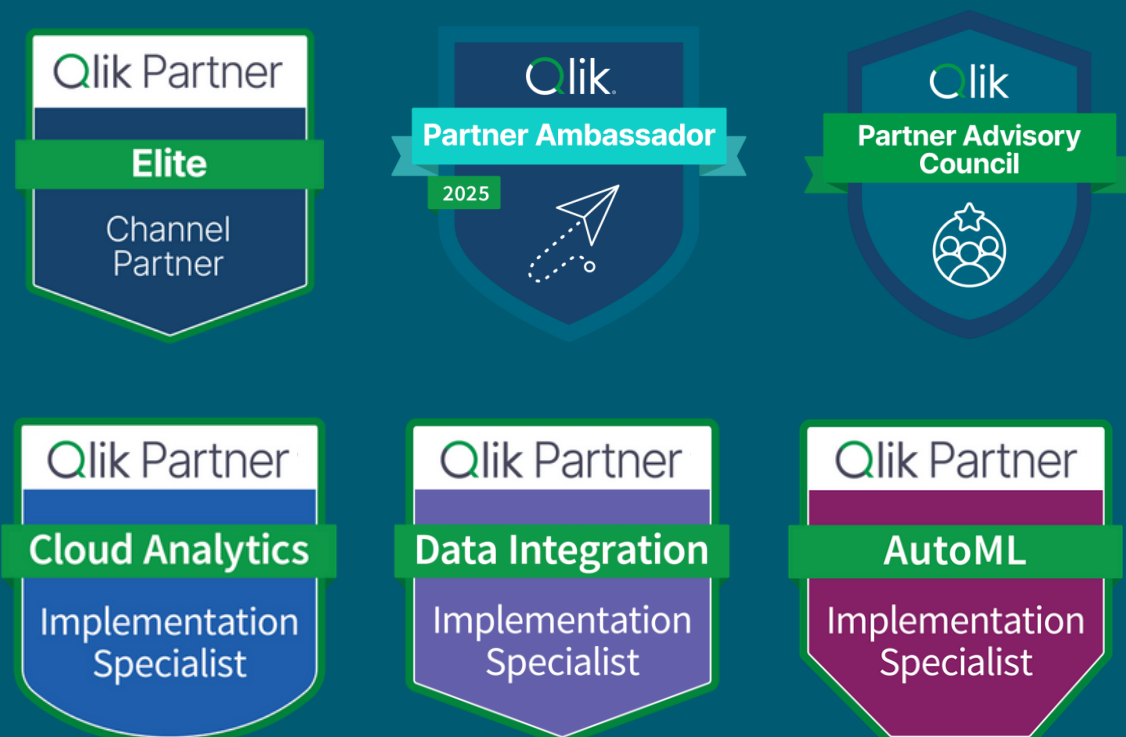

Vendor-agnostic approach

We are the UK's largest Qlik consultancy

We provide organisations with the insight and tools they need to unlock the full potential of their data and make more informed business decisions.

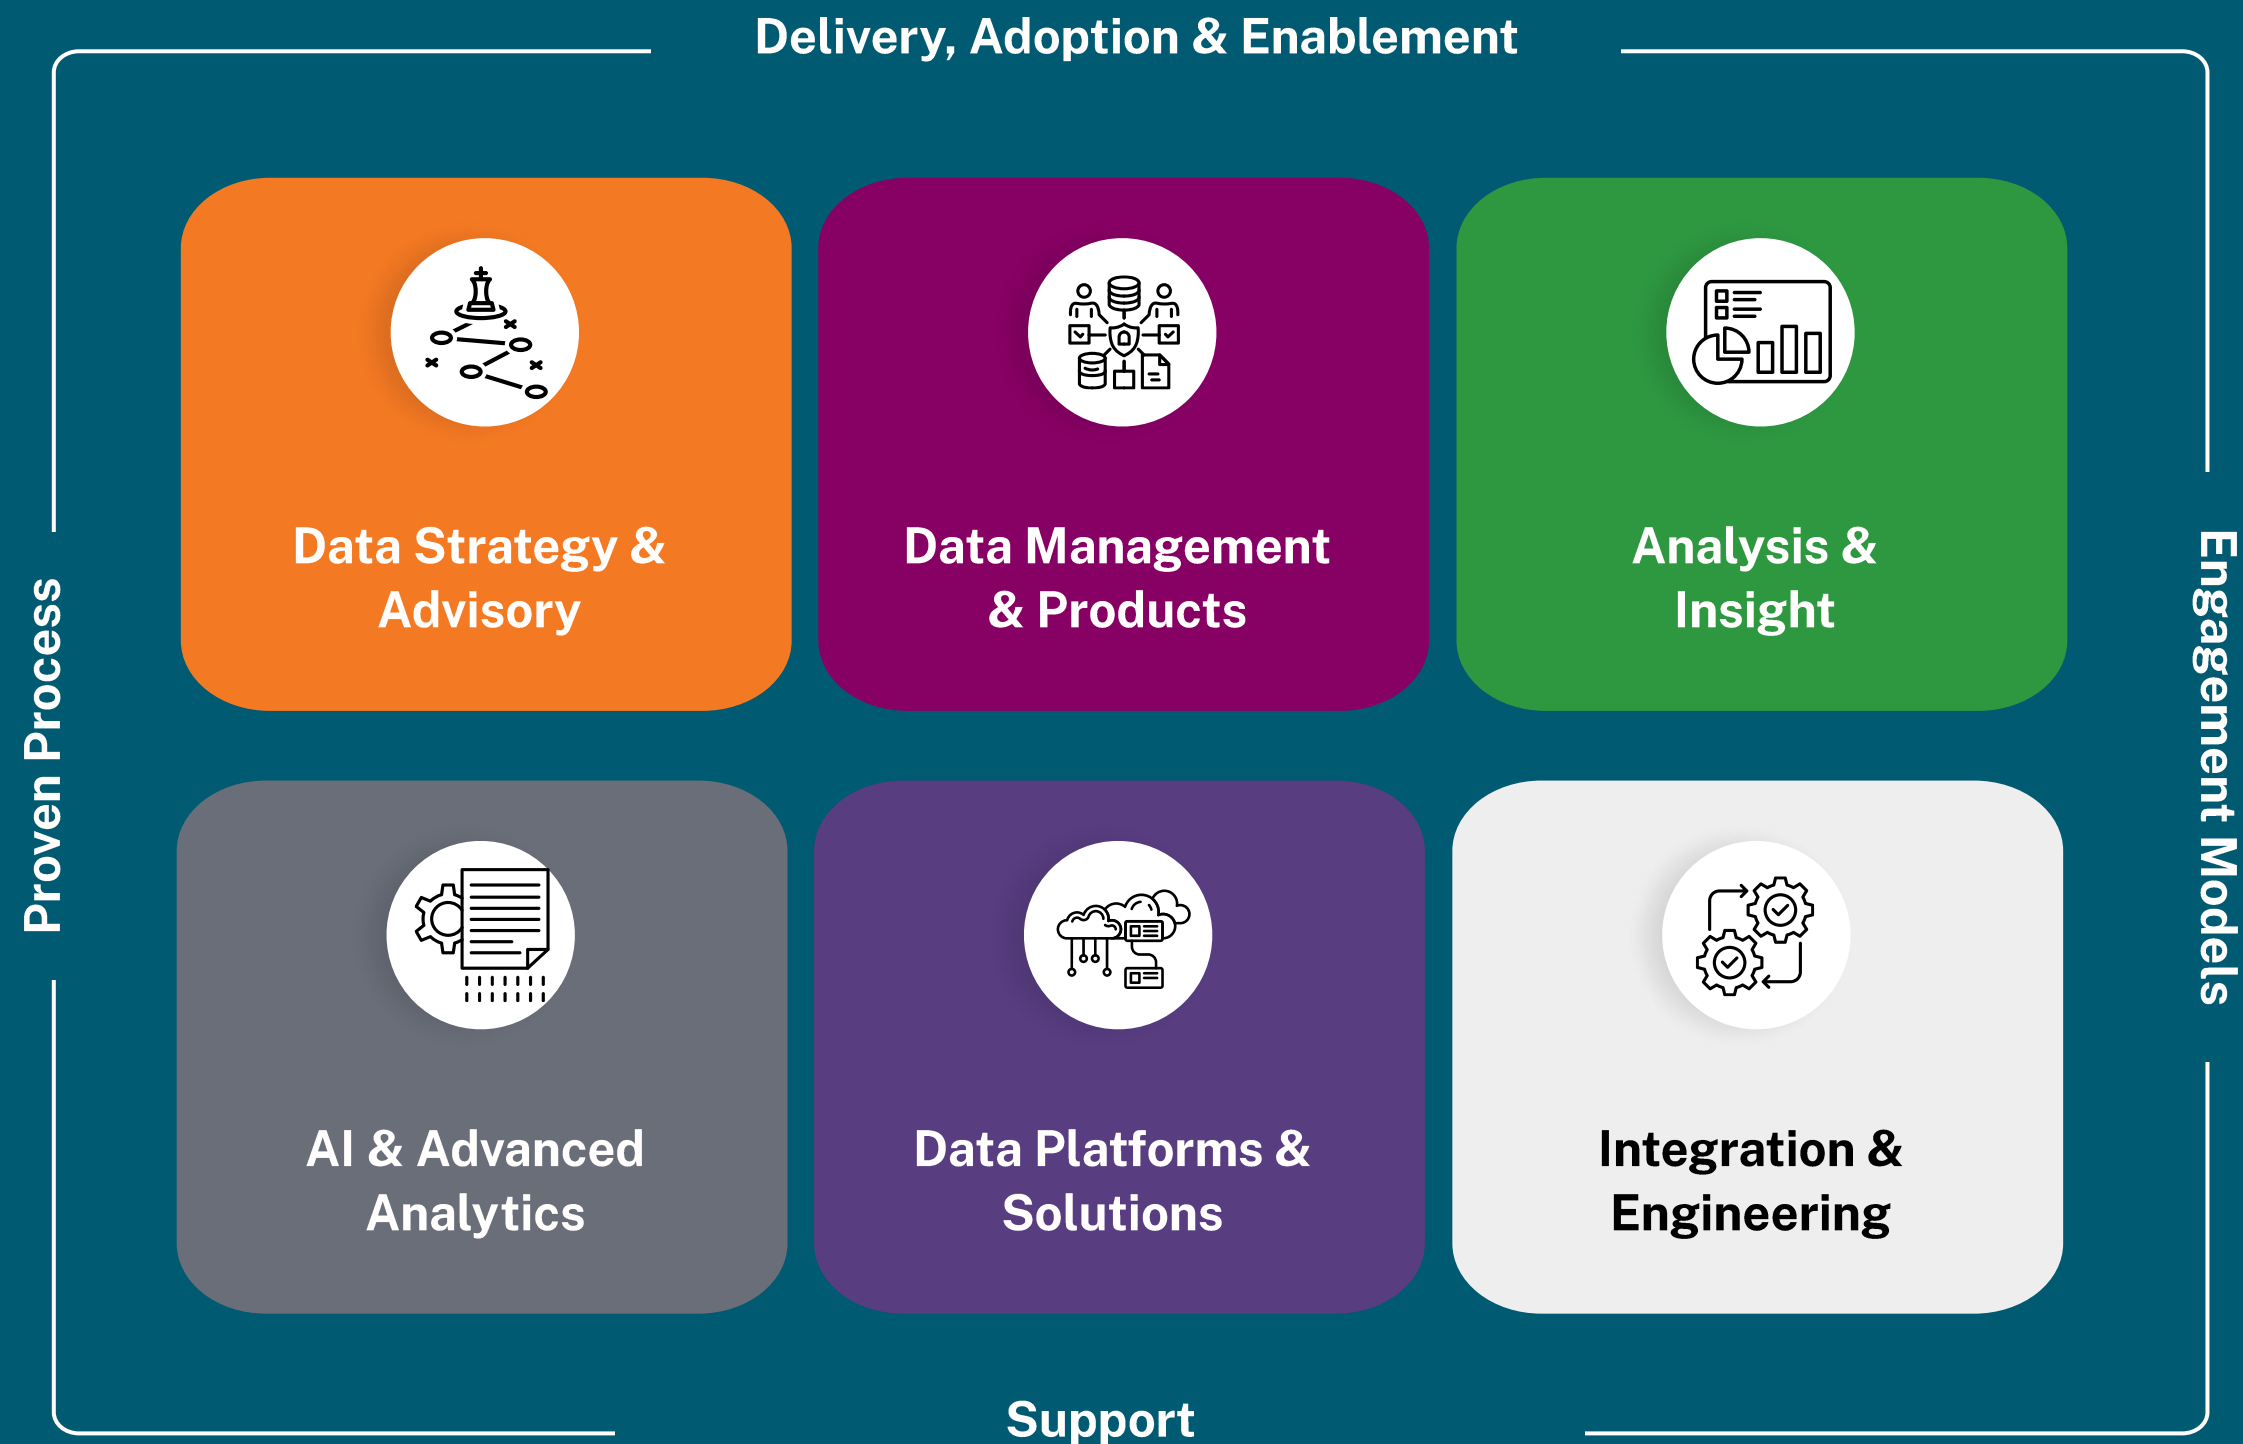

Our team of consultants is one of the most experienced in the Qlik partner channel. They will provide best-practice advice whilst configuring the software to your specific requirements.

We have delivered multiple Snowflake projects across our customer base and continue to work on the latest features within that product.

- ✓ Ometis is an authorised reseller and delivery partner of Qlik.
- ✓ The cloud software provided under this Lot 2b service is Qlik software, and all relevant product accreditations and certifications are held by Qlik as the technology provider.
- ✓ Ometis is contractually authorised to resell, implement, and support Qlik software and acts as the contracting supplier for this G-Cloud service.

WHAT WE DO

25 years experience

250+ UK customers

Vendor-agnostic approach

Our Proven Process balances strategic planning, practical delivery and continuous improvement.

It's based on 25 years delivering data solutions for 250+ UK customers and tailored to your needs.

1

Understand "Define the journey"

Before any delivery begins, we listen to your goals and challenges, understand how your data, systems, and teams work, and align everyone on what success looks like.

This ensures we're solving the right problem.

2

Deliver "Govern the work"

We design and build solutions that fit your needs and constraints, keeping delivery controlled and transparent throughout.

Training and adoption support are built in, so your teams understand and use what's being delivered.

3

Assure "Realise the value"

We review what's been built against your original goals and make sure the solution is stable, secure and understood.

Whether you continue independently or with our ongoing support, you're in a strong position to maintain and improve it.

25 years experience
