

G-Cloud 15 Service Description

Data Platform Optimisation & Modernisation

SERVICE OVERVIEW

Data Platform Optimisation & Modernisation

Ometis optimises and modernises existing cloud data and analytics platforms. We review performance, cost, data structures, and usage patterns, then implement targeted improvements. The service helps organisations improve efficiency, reduce cost, strengthen governance, and maximise value from existing cloud data and analytics investments.

Service Features

1. Assessment of existing data platform performance, usage, and health
2. Identification of optimisation and targeted modernisation opportunities
3. Cost, consumption, and efficiency analysis across cloud data services
4. FinOps-aligned cost management and optimisation improvements
5. Optimisation of platform performance, scalability, and reliability
6. Architecture modernisation aligned to future analytics and AI needs
7. Security, governance, and control improvements where required
8. Prioritisation of improvement recommendations based on value and effort
9. Knowledge transfer supporting sustainable internal optimisation capability
10. Phased roadmap for ongoing platform improvement and modernisation

Service Benefits

1. Improves value for money from existing data platform investments
2. Improves analytics performance, reliability, and service responsiveness
3. Extends the value and lifespan of existing cloud investments
4. Strengthens data governance, controls, and compliance assurance
5. Improves user experience, adoption, and trust in analytics
6. Identifies underused, inefficient, or redundant cloud services
7. Supports sustainable platform growth aligned to organisational demand
8. Reduces operational risk, complexity, and support overhead
9. Improves scalability to meet future analytics and data needs
10. Enables improved financial control and return on cloud spend

25 years experience

250+ UK customers

Vendor-agnostic approach

SERVICE DELIVERY

Delivery Approach:

Services are delivered using a simple, structured approach:

1

Understand

Assess current platform performance, cost, and operational constraints

2

Deliver

Implement agreed optimisation and modernisation improvements

3

Assure

Validate improvements and support sustainable ongoing operation

Service Scope

Included

- Platform performance and cost assessment
- Optimisation and modernisation recommendations
- Implementation of agreed improvements
- FinOps and governance considerations
- Documentation and knowledge transfer

Excluded

- Full platform re-implementation (procured separately)
- Migration between platforms unless explicitly agreed (procured separately)
- Long-term managed services (procured separately)
- Software licensing or resale (procured separately)

Service Constraints

Services can be delivered remotely or onsite. Remote delivery is available as standard. Where onsite delivery is requested, reasonable travel and subsistence costs may apply and will be agreed in advance as part of the call-off arrangement. Delivery schedules and locations are confirmed during mobilisation.

Security and Compliance

The service is delivered in line with G-Cloud framework requirements and buyer policies. Appropriate staff screening is applied. Any buyer-specific security, access or data handling requirements are agreed at call-off.

Ordering and Onboarding

The service is ordered via a G-Cloud call-off agreement. During onboarding, Ometis works with the buyer to confirm service scope, delivery approach, pricing, schedule and logistics prior to delivery commencing.

Service Management

Delivery is managed through agreed points of contact and delivery plans. Progress is monitored, issues are addressed as required, and service completion is confirmed at the end of the engagement.

WHAT WE DO

25 years experience

250+ UK customers

Vendor-agnostic approach

HOW WE WORK

Our Proven Process balances strategic planning, practical delivery and continuous improvement.

It's based on 25 years delivering data solutions for 250+ UK customers and tailored to your needs.

1

Understand "Define the journey"

Before any delivery begins, we listen to your goals and challenges, understand how your data, systems, and teams work, and align everyone on what success looks like.

This ensures we're solving the right problem.

2

Deliver "Govern the work"

We design and build solutions that fit your needs and constraints, keeping delivery controlled and transparent throughout.

Training and adoption support are built in, so your teams understand and use what's being delivered.

3

Assure "Realise the value"

We review what's been built against your original goals and make sure the solution is stable, secure and understood.

Whether you continue independently or with our ongoing support, you're in a strong position to maintain and improve it.
