Valto

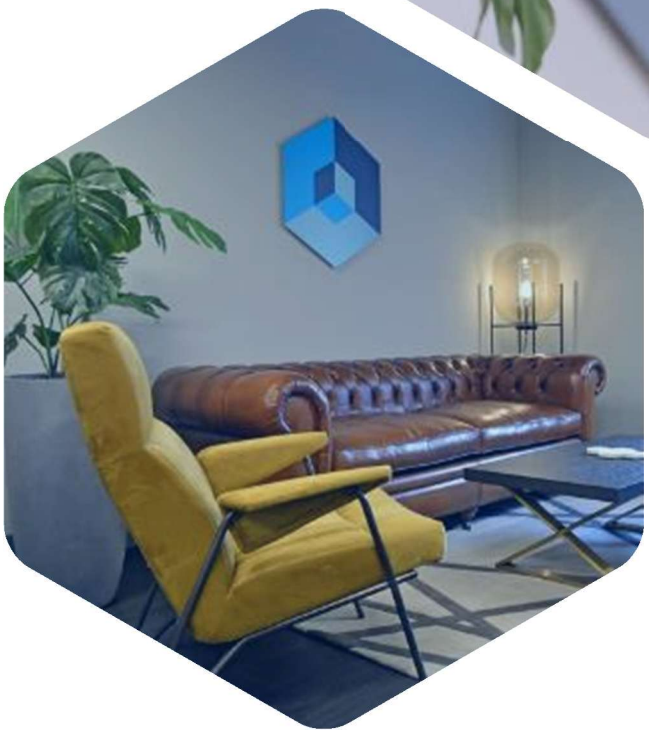

Azure Scoping Workshop

G-Cloud 15 Service Description

Valto

Valto build the intelligent workplace of the future

Powered by Microsoft

Microsoft 365 · SharePoint · Power Apps · Teams · Azure · Intune · Copilot · Viva

Valto is a Microsoft specialist committed to helping customers get more from Microsoft.

As a Microsoft Solutions Partner, we are experts in Microsoft Technologies including Modern Workplace, Microsoft 365, Azure, Business Applications, Data & AI.

One of our primary goals is to help "Change the World" by Impacting 1 million lives positively through social initiatives and working with non-profits.

Our Vision

- Best place to work
- Biggest and best projects
- Happiest Customers
- Change the World
- Best Culture
- Best Talent

MODERN WORKPLACE

DEVELOPING INTRANET, DOCUMENT MANAGEMENT AND HYBRID WAYS OF WORKING SOLUTIONS USING MICROSOFT TEAMS, SHAREPOINT, VIVA, AND OTHER MICROSOFT 365 SERVICES

MICROSOFT 365 & AZURE

ASSISTING ORGANISATIONS MANAGING DEVICES INCLUDING DESKTOPS / MOBILES AND MIGRATING TRADITIONAL SERVERS INFRASTRUCTURE TO THE AZURE PUBLIC CLOUD

BUSINESS APPLICATIONS

PROVIDING DEVELOPMENT SOLUTIONS AROUND THE MICROSOFT POWER PLATFORM INCLUDING POWER APPS, POWER BI AND POWER AUTOMATE

DATA & AI

PROVIDING AI SOLUTIONS INCLUDING FABRIC, POWER BI, AZURE PRO CODE DEVELOPMENT AND COPILOT

MANAGED SERVICES

PROVIDING MANAGED SERVICES FOR ALL THE PILLARS OUTLINED INCLUDING IT SUPPORT FOR ORGANISATIONS.

Microsoft Solutions Partners

Microsoft Solutions Partner in Modern Work

Modern Work Solution Partners have demonstrated the capabilities to deploy for SMB & Enterprise based on performance, skilling and customer success.

We also hold the less common Microsoft Adoption and Change Management Advanced Specialization, which, in short, means that our projects stand an extremely high chance of successful adoption.

Microsoft Solutions Partner in Digital & App Innovation

As a Solutions Partner for Digital & App Innovation we have demonstrated our broad capability to help customers build, run, and manage applications across multiple clouds, on premises, and at the edge.

Additionally, we hold the Low Code Application Development Advanced Specialization which includes Microsoft Power Apps and Microsoft Power Automate, to rapidly develop custom and flexible low-code line-of-business solutions.

Service Description

Summary

Valto's Azure Scoping Workshop helps organisations define a clear, delivery-ready scope for Azure solutions. Through detailed discovery and expert guidance, we translate cloud requirements into a structured scope aligned to infrastructure, security, automation, and business objectives. We will provide a fixed price proposal for our services.

Service Details

The Azure Scoping Workshop is a structured engagement designed to move from high-level cloud ambitions to a clearly defined Azure delivery scope. Valto works with business and technical stakeholders to understand requirements, constraints, dependencies, and success criteria.

During the workshop, we explore Azure requirements across infrastructure, networking, identity, security, automation, data, and AI services. This includes scoping Azure IaaS and PaaS services, security controls, identity models, and integration with Microsoft 365 and existing systems.

The session focuses on defining what is in scope and out of scope, identifying assumptions, risks, and dependencies, and agreeing priorities. This ensures expectations are aligned and reduces ambiguity before delivery begins.

Following the workshop, Valto produces a documented scope including requirements, risks, assumptions, and a recommended delivery approach. This output supports internal planning, procurement, or a fixed scope Azure implementation engagement.

Service features

- Azure consultancy scoping and discovery workshops
- Infrastructure and platform services scoping
- Azure security and identity services definition
- Automation and integration services assessment
- Azure AI and data services scoping
- In-scope and out-of-scope definition
- Dependency and risk identification
- Cloud architecture consultancy guidance
- Delivery approach and phasing recommendations
- Documented Azure scope and consultancy outputs

Service benefits

- Provides a clear Azure implementation scope
- Reduces delivery risk and scope creep
- Improves accuracy of Azure delivery estimates
- Aligns stakeholders with Azure consultancy guidance
- Supports informed cloud investment decisions
- Accelerates readiness for Azure services delivery
- Improves security and governance planning
- Reduces rework during cloud implementation
- Maximises value from Azure consultancy services
- Enables confident decision-making for Azure projects

Service constraints

Access to relevant stakeholders, architecture documentation, and system information is required. Outputs are advisory and form the basis for delivery planning or implementation services rather than deployed Azure solutions.

Case Studies

Reducing waste through an efficient uniform ordering app to save money.

Chester Zoo staff members needed a way to keep track of previous orders and collections and an easier way to approve or reject any uniform related requests.

City of London Case Study

The City of London previously managed its gardens with pen and paper.

Their goal was simple: build a Microsoft Power App solution that would streamline garden management for London's fieldworkers and administrators alike. The solution would have to be easy to use, scalable, and securely available on employee mobile devices.

North Wales Fire and Rescue Services Case Study

NWFRS enhances emergency response with secure intranet deployment.

NWFRS needed to upgrade their on-premises information systems. By leveraging existing Microsoft 365 licenses, NWFRS achieved streamlined workflows and improved communication without incurring extra costs.
