PROVIDING MANAGED SERVICES FOR ALL THE PILLARS OUTLINED INCLUDING IT SUPPORT FOR ORGANISATIONS.

Microsoft Solutions Partners

Microsoft Solutions Partner in Modern Work

Modern Work Solution Partners have demonstrated the capabilities to deploy for SMB & Enterprise based on performance, skilling and customer success.

We also hold the less common Microsoft Adoption and Change Management Advanced Specialization, which, in short, means that our projects stand an extremely high chance of successful adoption.

Microsoft Solutions Partner in Digital & App Innovation

As a Solutions Partner for Digital & App Innovation we have demonstrated our broad capability to help customers build, run, and manage applications across multiple clouds, on premises, and at the edge.

Additionally, we hold the Low Code Application Development Advanced Specialization which includes Microsoft Power Apps and Microsoft Power Automate, to rapidly develop custom and flexible low-code line-of-business solutions.

Service Description

Summary

Valto's Intune Setup and Deployment service delivers secure, scalable endpoint management using Microsoft Intune. Our consultants configure device, application, and security controls to enable compliant, productive working across modern device estates. We can offer fixed price projects.

Service Details

The Intune Setup and Deployment service is designed to help organisations implement Microsoft Intune in a controlled, secure, and user-focused way. Valto works with stakeholders to confirm objectives, device scope, user profiles, and security requirements before deployment begins.

Our Intune consultancy configures device enrolment, compliance policies, security baselines, and application management across Windows, iOS, Android, and macOS where required. We integrate Intune with identity and access controls to ensure consistent security and manageability.

Deployment follows Microsoft best practices to minimise disruption and support rapid adoption. We validate configurations, test policies, and ensure devices are enrolled and compliant before go-live.

Following deployment, Valto provides documentation, knowledge transfer, and recommendations for optimisation and next steps. Ongoing Intune consultancy and support services can be provided to support continuous improvement.

Service features

- Microsoft Intune setup and deployment consultancy
- Device enrolment and management services
- Windows, iOS, Android, and macOS configuration
- Application management and app protection policies
- Security baselines and compliance policy setup
- Identity and access integration services
- Conditional access and device compliance alignment
- Testing, validation, and deployment assurance
- Documentation and knowledge transfer services
- Ongoing Intune consultancy options

Service benefits

- Delivers secure endpoint management services
- Improves device compliance and security posture
- Reduces risk through expert Intune consultants
- Simplifies application and device management
- Supports flexible and remote working securely
- Improves user experience with managed devices
- Aligns endpoint security with business objectives
- Accelerates deployment with Intune consultancy
- Reduces operational overhead for IT teams
- Maximises value from Intune services

Service constraints

The Intune Setup and Deployment service is typically delivered remotely but can be delivered onsite by agreement. The service focuses on configuration and deployment and does not include ongoing managed services unless separately agreed. Appropriate Microsoft licensing is required. Access to the Microsoft 365 tenant, identity platform, device estate information, and stakeholder availability is required. Deployment scope and timelines depend on device volumes, platforms, and agreed requirements.

Case Studies

Chester Zoo Case Study

Reducing waste through an efficient uniform ordering app to save money.

Chester Zoo staff members needed a way to keep track of previous orders and collections and an easier way to approve or reject any uniform related requests.

City of London Case Study

The City of London previously managed its gardens with pen and paper.

Their goal was simple: build a Microsoft Power App solution that would streamline garden management for London's fieldworkers and administrators alike. The solution would have to be easy to use, scalable, and securely available on employee mobile devices.

North Wales Fire and Rescue Services Case Study

NWFRS enhances emergency response with secure intranet deployment.

NWFRS needed to upgrade their on-premises information systems. By leveraging existing Microsoft 365 licenses, NWFRS achieved streamlined workflows and improved communication without incurring extra costs.
