Management

Microsoft Solutions Partner in Modern Work

Modern Work Solution Partners have demonstrated the capabilities to deploy for SMB & Enterprise based on performance, skilling and customer success.

We also hold the less common [Microsoft Adoption and Change Management Advanced Specialization](#), which, in short, means that our projects stand an extremely high chance of successful adoption.

Microsoft Solutions Partner in Digital & App Innovation

As a Solutions Partner for Digital & App Innovation we have demonstrated our broad capability to help customers build, run, and manage applications across multiple clouds, on premises, and at the edge.

Additionally, we hold the [Low Code Application Development Advanced Specialization](#) which includes Microsoft Power Apps and Microsoft Power Automate, to rapidly develop custom and flexible low-code line-of-business solutions.

Service Description

Summary

Valto's Azure Deployment service delivers secure, scalable Azure environments aligned to business objectives. Our Azure consultants design, configure, and deploy cloud services covering infrastructure, security, identity, automation, virtual machine and AI to enable reliable, production-ready platforms.

Service Details

The Azure Deployment service is designed to help organisations implement Azure services in a controlled and secure way. Valto works with stakeholders to confirm objectives, scope, and success criteria before deployment begins.

Our Azure consultancy team designs and deploys Azure solutions across infrastructure, networking, identity, security, automation, data, and AI services. This includes Azure IaaS and PaaS components, identity and access management, governance controls, and integrations with Microsoft 365 and existing systems.

Deployment activities follow Microsoft and industry best practices to ensure environments are secure, resilient, and scalable. We apply consistent configuration standards, validation, and testing to reduce risk and support long-term manageability.

Following deployment, Valto provides documentation, knowledge transfer, and recommendations for optimisation and next steps. Ongoing Azure consultancy and managed services can be provided to support continued growth and improvement.

Service features

- Azure deployment consultancy and delivery services
 - Azure IaaS and PaaS services implementation
 - Identity and access management deployment
 - Azure security and governance configuration
 - Networking and connectivity services setup
 - Automation and monitoring services deployment
 - Azure AI and data services configuration
 - Integration with Microsoft cloud services
 - Testing, validation, and deployment assurance
 - Documentation and Azure consultancy handover
-

Service benefits

- Delivers secure, production-ready Azure services
 - Reduces risk through expert Azure consultancy
 - Improves scalability and platform resilience
 - Accelerates cloud adoption with Azure consultants
 - Aligns Azure deployment to business objectives
 - Strengthens security and governance controls
 - Improves operational efficiency in the cloud
 - Supports long-term Azure platform growth
 - Maximises value from Azure consultancy services
 - Enables confident cloud operations post-deployment
-

Service constraints

The Azure Deployment service is typically delivered remotely but can be delivered onsite by agreement. The service focuses on Azure configuration and deployment and does not include ongoing managed services unless separately agreed. Access to Azure subscriptions, appropriate permissions, and stakeholder availability is required. Deployment scope, timelines, and services delivered depend on agreed requirements and organisational complexity.

Case Studies

Chester Zoo Case Study

Reducing waste through an efficient uniform ordering app to save money.

Chester Zoo staff members needed a way to keep track of previous orders and collections and an easier way to approve or reject any uniform related requests.

City of London Case Study

The City of London previously managed its gardens with pen and paper.

Their goal was simple: build a Microsoft Power App solution that would streamline garden management for London's fieldworkers and administrators alike. The solution would have to be easy to use, scalable, and securely available on employee mobile devices.

North Wales Fire and Rescue Services Case Study

NWFRS enhances emergency response with secure intranet deployment.

NWFRS needed to upgrade their on-premises information systems. By leveraging existing Microsoft 365 licenses, NWFRS achieved streamlined workflows and improved communication without incurring extra costs.
