PROVIDING DEVELOPMENT SOLUTIONS AROUND THE MICROSOFT POWER PLATFORM INCLUDING POWER APPS, POWER BI AND POWER AUTOMATE

DATA & AI

PROVIDING AI SOLUTIONS INCLUDING FABRIC, POWER BI, AZURE PRO CODE DEVELOPMENT AND COPILOT

MANAGED SERVICES

PROVIDING MANAGED SERVICES FOR ALL THE PILLARS OUTLINED INCLUDING IT SUPPORT FOR ORGANISATIONS.

Microsoft Solutions Partners

Microsoft Solutions Partner in Modern Work

Modern Work Solution Partners have demonstrated the capabilities to deploy for SMB & Enterprise based on performance, skilling and customer success.

We also hold the less common Microsoft Adoption and Change Management Advanced Specialization, which, in short, means that our projects stand an extremely high chance of successful adoption.

Microsoft Solutions Partner in Digital & App Innovation

As a Solutions Partner for Digital & App Innovation we have demonstrated our broad capability to help customers build, run, and manage applications across multiple clouds, on premises, and at the edge.

Additionally, we hold the Low Code Application Development Advanced Specialization which includes Microsoft Power Apps and Microsoft Power Automate, to rapidly develop custom and flexible low-code line-of-business solutions.

Service Description

Summary

Valto's Power Apps Envisioning Workshop helps organisations define how Power Apps can support process improvement and digital transformation. Through structured discovery and expert guidance, we identify high-value app use cases and create a clear roadmap for adoption.

Service Details

The Power Apps Envisioning Workshop is a structured engagement designed to help organisations understand how Power Apps can be used to address business challenges. Valto works with key stakeholders to explore current processes, pain points, and desired outcomes.

During the workshop, we review existing manual or inefficient processes and explore Power Apps capabilities including canvas apps, model-driven apps, and integration with Microsoft 365 and Dataverse. We identify opportunities to automate, streamline, and improve user experience.

The session combines facilitated discussions, practical examples, and real-world scenarios. This enables stakeholders to identify high-impact use cases, understand technical considerations, and make informed decisions before committing to development.

Following the workshop, Valto provides documented recommendations, priorities, and next steps. This includes a clear roadmap covering adoption approach, governance considerations, and phased delivery aligned to business goals.

Service features

- Stakeholder discovery and facilitated workshops
- Power Apps capability overview and demonstrations
- Process review and improvement identification
- Use-case identification and prioritisation
- Dataverse and integration considerations
- Governance and security guidance
- Low-code solution design principles
- Adoption and skills planning advice
- Alignment with Power Platform best practices
- Documented recommendations and roadmap

Service benefits

- Identifies high-value automation opportunities
- Improves process efficiency and productivity
- Reduces reliance on manual processes
- Aligns app development with business objectives
- Supports informed low-code investment decisions
- Accelerates digital transformation planning
- Improves user experience through tailored apps
- Reduces development risk and rework
- Provides a clear Power Apps roadmap
- Maximises value from Power Apps investment

Service constraints

The service focuses on planning and recommendations rather than app development. Access to relevant stakeholders, process documentation, and existing systems information is required. Outputs are advisory and do not include app build or deployment unless separately agreed.

Case Studies

Chester Zoo Case Study

Reducing waste through an efficient uniform ordering app to save money.

Chester Zoo staff members needed a way to keep track of previous orders and collections and an easier way to approve or reject any uniform related requests.

City of London Case Study

The City of London previously managed its gardens with pen and paper.

Their goal was simple: build a Microsoft Power App solution that would streamline garden management for London's fieldworkers and administrators alike. The solution would have to be easy to use, scalable, and securely available on employee mobile devices.

North Wales Fire and Rescue Services Case Study

NWFRS enhances emergency response with secure intranet deployment.

NWFRS needed to upgrade their on-premises information systems. By leveraging existing Microsoft 365 licenses, NWFRS achieved streamlined workflows and improved communication without incurring extra costs.
