Valto

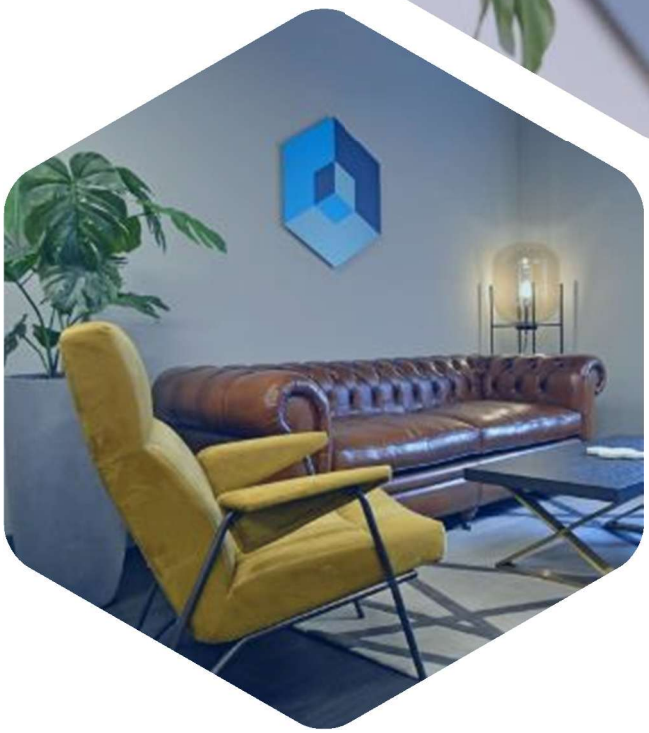

Microsoft Logic App Development Project

G-Cloud 15 Service Description

Valto

Valto build the intelligent workplace of the future

Powered by Microsoft

Microsoft 365 · SharePoint · Power Apps · Teams · Azure · Intune · Copilot · Viva

Valto is a Microsoft specialist committed to helping customers get more from Microsoft.

As a Microsoft Solutions Partner, we are experts in Microsoft Technologies including Modern Workplace, Microsoft 365, Azure, Business Applications, Data & AI.

One of our primary goals is to help "Change the World" by Impacting 1 million lives positively through social initiatives and working with non-profits.

Our Vision

- Best place to work
- Biggest and best projects
- Happiest Customers
- Change the World
- Best Culture
- Best Talent

MODERN WORKPLACE

DEVELOPING INTRANET, DOCUMENT MANAGEMENT AND HYBRID WAYS OF WORKING SOLUTIONS USING MICROSOFT TEAMS, SHAREPOINT, VIVA, AND OTHER MICROSOFT 365 SERVICES

MICROSOFT 365 & AZURE

ASSISTING ORGANISATIONS MANAGING DEVICES INCLUDING DESKTOPS / MOBILES AND MIGRATING TRADITIONAL SERVERS INFRASTRUCTURE TO THE AZURE PUBLIC CLOUD

BUSINESS APPLICATIONS

PROVIDING DEVELOPMENT SOLUTIONS AROUND THE MICROSOFT POWER PLATFORM INCLUDING POWER APPS, POWER BI AND POWER AUTOMATE

DATA & AI

PROVIDING AI SOLUTIONS INCLUDING FABRIC, POWER BI, AZURE PRO CODE DEVELOPMENT AND COPILOT

MANAGED SERVICES

PROVIDING MANAGED SERVICES FOR ALL THE PILLARS OUTLINED INCLUDING IT SUPPORT FOR ORGANISATIONS.

Microsoft Solutions Partners

Microsoft Solutions Partner in Modern Work

Modern Work Solution Partners have demonstrated the capabilities to deploy for SMB & Enterprise based on performance, skilling and customer success.

We also hold the less common Microsoft Adoption and Change Management Advanced Specialization, which, in short, means that our projects stand an extremely high chance of successful adoption.

Microsoft Solutions Partner in Digital & App Innovation

As a Solutions Partner for Digital & App Innovation we have demonstrated our broad capability to help customers build, run, and manage applications across multiple clouds, on premises, and at the edge.

Additionally, we hold the Low Code Application Development Advanced Specialization which includes Microsoft Power Apps and Microsoft Power Automate, to rapidly develop custom and flexible low-code line-of-business solutions.

Service Description

Summary

Valto's Microsoft Logic App Development service designs and builds scalable integration workflows using Azure Logic Apps. We deliver reliable, secure solutions that automate complex processes and connect systems across cloud and on-premise environments to a fixed price projects.

Service Details

The Microsoft Logic App Development service is designed to help organisations automate and integrate business processes at scale. Valto works with stakeholders to understand integration requirements, systems involved, and operational objectives before development begins.

We design and build Azure Logic Apps to orchestrate workflows across applications, data sources, and services. This includes API integrations, message handling, error management, and secure connectivity to ensure robust and maintainable solutions.

Our delivery approach follows proven integration best practices. We focus on reliability, scalability, monitoring, and maintainability to ensure workflows operate effectively in production environments.

Following development, Valto provides documentation, knowledge transfer, and recommendations for ongoing optimisation. Additional enhancements and support services can be delivered as integration needs evolve.

Service features

- Azure Logic App workflow development
- System and application integration design
- API and connector configuration
- Data transformation and routing logic
- Error handling and monitoring setup
- Secure authentication and access control
- Hybrid and cloud integration support
- Testing and quality assurance
- Deployment and environment configuration
- Documentation and knowledge transfer

Service benefits

- Automates complex integration processes
- Improves reliability of system integrations
- Reduces manual intervention and errors
- Supports scalable enterprise workflows
- Enables secure data exchange
- Improves visibility through monitoring
- Aligns integrations with business objectives
- Reduces integration maintenance risk
- Improves operational efficiency
- Increases return on integration investment

Service constraints

The Microsoft Logic App Development service is typically delivered remotely but can be delivered onsite by agreement. The service focuses on workflow and integration development and does not include ongoing operational support unless separately agreed. Access to Azure subscriptions, target systems, APIs, and stakeholder availability is required. Delivery timelines depend on scope, complexity, and integration requirements.

Case Studies

Chester Zoo Case Study

Reducing waste through an efficient uniform ordering app to save money.

Chester Zoo staff members needed a way to keep track of previous orders and collections and an easier way to approve or reject any uniform related requests.

City of London Case Study

The City of London previously managed its gardens with pen and paper.

Their goal was simple: build a Microsoft Power App solution that would streamline garden management for London's fieldworkers and administrators alike. The solution would have to be easy to use, scalable, and securely available on employee mobile devices.

North Wales Fire and Rescue Services Case Study

NWFRS enhances emergency response with secure intranet deployment.

NWFRS needed to upgrade their on-premises information systems. By leveraging existing Microsoft 365 licenses, NWFRS achieved streamlined workflows and improved communication without incurring extra costs.
