PROVIDING MANAGED SERVICES FOR ALL THE PILLARS OUTLINED INCLUDING IT SUPPORT FOR ORGANISATIONS.

Microsoft Solutions Partners

Microsoft Solutions Partner in Modern Work

Modern Work Solution Partners have demonstrated the capabilities to deploy for SMB & Enterprise based on performance, skilling and customer success.

We also hold the less common Microsoft Adoption and Change Management Advanced Specialization, which, in short, means that our projects stand an extremely high chance of successful adoption.

Microsoft Solutions Partner in Digital & App Innovation

As a Solutions Partner for Digital & App Innovation we have demonstrated our broad capability to help customers build, run, and manage applications across multiple clouds, on premises, and at the edge.

Additionally, we hold the Low Code Application Development Advanced Specialization which includes Microsoft Power Apps and Microsoft Power Automate, to rapidly develop custom and flexible low-code line-of-business solutions.

Service Description

Summary
Valto's Fabric New Requirements Workshop helps organisations capture, validate, and prioritise new data and analytics requirements. Through structured stakeholder engagement and expert facilitation, we translate evolving reporting and data needs into clear, actionable requirements with a fixed price proposal.

Service Details
The Fabric New Requirements Workshop is a focused engagement designed to identify new or changing requirements for an existing Microsoft Fabric or analytics environment. Valto works with business and technical stakeholders to understand current challenges, data gaps, and emerging needs.
During the workshop, we review existing data sources, reporting outputs, and analytics processes. We explore ingestion, modelling, governance, and reporting requirements to ensure new needs align with Microsoft Fabric capabilities and organisational standards.
The session is highly interactive, combining facilitated discussions with practical examples and expert guidance. This ensures requirements are clearly defined, prioritised, and agreed, reducing ambiguity and future delivery risk.
Following the workshop, Valto provides a documented set of prioritised requirements with recommendations and next steps. These outputs can be used to inform solution design, development, or internal planning activities.

Service features
- Stakeholder workshops to capture new requirements
- Review of existing data and analytics landscape
- Functional and non-functional requirements definition
- Data ingestion and modelling requirement assessment
- Governance, security, and compliance considerations
- Reporting and analytics requirement identification
- Prioritisation by business value and readiness
- Alignment with Microsoft Fabric best practices
- Validation of requirements with stakeholders
- Documented requirements and recommendations

Service benefits
- Clarifies new analytics requirements across stakeholders
- Reduces rework caused by unclear requirements
- Improves alignment between business and technical teams
- Supports better planning for analytics improvements
- Prioritises work based on business value
- Reduces delivery risk for future changes
- Improves decision-making through clearer requirements
- Ensures requirements align with platform capabilities
- Provides a strong foundation for implementation
- Supports informed data investment decisions

Service constraints
The Fabric New Requirements Workshop is typically delivered remotely but can be delivered onsite by agreement. The service focuses on requirements discovery and definition only and does not include technical implementation. Access to relevant stakeholders, data documentation, and current analytics outputs is required to achieve effective outcomes.

Case Studies

Chester Zoo Case Study

Reducing waste through an efficient uniform ordering app to save money.

Chester Zoo staff members needed a way to keep track of previous orders and collections and an easier way to approve or reject any uniform related requests.

City of London Case Study

The City of London previously managed its gardens with pen and paper.

Their goal was simple: build a Microsoft Power App solution that would streamline garden management for London's fieldworkers and administrators alike. The solution would have to be easy to use, scalable, and securely available on employee mobile devices.

North Wales Fire and Rescue Services Case Study

NWFRS enhances emergency response with secure intranet deployment.

NWFRS needed to upgrade their on-premises information systems. By leveraging existing Microsoft 365 licenses, NWFRS achieved streamlined workflows and improved communication without incurring extra costs.
