Microsoft Solutions Partners

Microsoft Solutions Partner in Modern Work

Modern Work Solution Partners have demonstrated the capabilities to deploy for SMB & Enterprise based on performance, skilling and customer success.

We also hold the less common Microsoft Adoption and Change Management Advanced Specialization, which, in short, means that our projects stand an extremely high chance of successful adoption.

Microsoft Solutions Partner in Digital & App Innovation

As a Solutions Partner for Digital & App Innovation we have demonstrated our broad capability to help customers build, run, and manage applications across multiple clouds, on premises, and at the edge.

Additionally, we hold the Low Code Application Development Advanced Specialization which includes Microsoft Power Apps and Microsoft Power Automate, to rapidly develop custom and flexible low-code line-of-business solutions.

Service Description

Summary
Valto's Fabric Health Check helps organisations assess the performance, governance, and effectiveness of their Microsoft Fabric environment. Through an objectives-led workshop and detailed assessment, we provide clear recommendations to improve reliability, security, and data value. You can take these recommendations and action them yourself or get a fixed price delivery from Valto.

Service Details
The Fabric Health Check is a structured engagement designed to evaluate an existing Microsoft Fabric environment against business and analytics objectives. It begins with a workshop to understand intended outcomes, current usage, and success measures.
Following the workshop, Valto conducts a detailed assessment covering data ingestion, lakehouse architecture, modelling, governance, security, and reporting. We identify issues that may impact performance, reliability, compliance, or scalability.
Our assessment combines technical review with insights into data usage and reporting behaviour. This ensures recommendations are practical, achievable, and aligned with how analytics is used across the organisation.
Valto produces a detailed health check report outlining findings, risks, and prioritised recommendations. These can be implemented by internal teams or delivered by Valto through a fixed price engagement to support agreed objectives.

Service features
- Objectives-led discovery and stakeholder workshop
- Review of Microsoft Fabric configuration
- Data ingestion and pipeline assessment
- Lakehouse and modelling structure review
- Governance and security assessment
- Reporting and analytics usage review
- Performance and scalability analysis
- Identification of risks and improvement opportunities
- Alignment with Microsoft Fabric best practices
- Prioritised recommendations and actions

Service benefits
- Identifies issues impacting analytics performance
- Aligns Fabric usage with business objectives
- Improves data reliability and trust
- Reduces governance and security risks
- Improves reporting effectiveness
- Supports informed analytics decision-making
- Enables confident internal ownership
- Improves return on Fabric investment
- Highlights quick wins and longer-term improvements
- Provides clear next steps for optimisation

Service constraints
The Fabric Health Check is typically delivered remotely but can be delivered onsite by agreement. The service includes assessment and recommendations only and does not include remediation unless separately agreed. Access to Microsoft Fabric environments, data sources, and stakeholder input is required. Recommendations reflect findings at the time of assessment and agreed objectives.

Case Studies

Chester Zoo Case Study

Reducing waste through an efficient uniform ordering app to save money.

Chester Zoo staff members needed a way to keep track of previous orders and collections and an easier way to approve or reject any uniform related requests.

City of London Case Study

The City of London previously managed its gardens with pen and paper.

Their goal was simple: build a Microsoft Power App solution that would streamline garden management for London's fieldworkers and administrators alike. The solution would have to be easy to use, scalable, and securely available on employee mobile devices.

North Wales Fire and Rescue Services Case Study

NWFRS enhances emergency response with secure intranet deployment.

NWFRS needed to upgrade their on-premises information systems. By leveraging existing Microsoft 365 licenses, NWFRS achieved streamlined workflows and improved communication without incurring extra costs.
