DATA & AI

PROVIDING AI SOLUTIONS INCLUDING FABRIC, POWER BI, AZURE PRO CODE DEVELOPMENT AND COPILOT

MANAGED SERVICES

PROVIDING MANAGED SERVICES FOR ALL THE PILLARS OUTLINED INCLUDING IT SUPPORT FOR ORGANISATIONS.

Microsoft Solutions Partners

Microsoft Solutions Partner in Modern Work

Modern Work Solution Partners have demonstrated the capabilities to deploy for SMB & Enterprise based on performance, skilling and customer success.

We also hold the less common Microsoft Adoption and Change Management Advanced Specialization, which, in short, means that our projects stand an extremely high chance of successful adoption.

Microsoft Solutions Partner in Digital & App Innovation

As a Solutions Partner for Digital & App Innovation we have demonstrated our broad capability to help customers build, run, and manage applications across multiple clouds, on premises, and at the edge.

Additionally, we hold the Low Code Application Development Advanced Specialization which includes Microsoft Power Apps and Microsoft Power Automate, to rapidly develop custom and flexible low-code line-of-business solutions.

Service Description

Summary

Valto's Microsoft 365 Security Hardening service strengthens security and compliance across Microsoft 365. We assess, configure, and align security controls to best practices, improving protection, visibility, and resilience while supporting secure and productive working.

Service Details

The Microsoft 365 Security Hardening service is designed to help organisations improve their security posture across Microsoft 365. Valto works with stakeholders to understand current risks, compliance requirements, and security objectives before applying recommended controls.

The service is delivered in structured levels aligned to recognised security standards. This includes baseline security hardening aligned to Cyber Essentials, as well as advanced controls available with Microsoft 365 Business Premium and above.

We configure auditing, alerts, and recommended security settings across core Microsoft 365 services including Exchange, SharePoint, OneDrive, and Microsoft Teams. Where appropriate, we also implement data protection, threat protection, and access controls to reduce risk.

Following delivery, Valto provides a clear summary of applied controls, remaining risks, and recommended next steps. This ensures organisations understand their security position and how to continue improving protection over time.

Service features

- Security hardening aligned to Cyber Essentials
- Auditing and alerting configuration
- Exchange Online security configuration
- SharePoint and OneDrive security settings
- Microsoft Teams security configuration
- Data loss prevention policy setup
- Advanced threat protection configuration
- Conditional access policy implementation
- Multi-factor authentication enforcement
- Intune application management policy

Service benefits

- Improves Microsoft 365 security posture
- Reduces risk of data loss and breach
- Strengthens identity and access protection
- Improves visibility through auditing and alerts
- Supports compliance with security standards
- Protects users without reducing productivity
- Reduces exposure to malicious activity
- Improves consistency of security controls
- Builds a foundation for secure growth
- Increases confidence in Microsoft 365 security

Service constraints

The Microsoft 365 Security Hardening service is typically delivered remotely but can be delivered onsite by agreement. Advanced security capabilities require appropriate Microsoft 365 licensing. The service focuses on configuration and hardening rather than ongoing monitoring or incident response. Access to Microsoft 365 tenant administration and relevant stakeholders is required. Recommendations and configurations reflect the environment at the time of delivery and agreed security objectives.

Case Studies

Chester Zoo Case Study

Reducing waste through an efficient uniform ordering app to save money.

Chester Zoo staff members needed a way to keep track of previous orders and collections and an easier way to approve or reject any uniform related requests.

City of London Case Study

The City of London previously managed its gardens with pen and paper.

Their goal was simple: build a Microsoft Power App solution that would streamline garden management for London's fieldworkers and administrators alike. The solution would have to be easy to use, scalable, and securely available on employee mobile devices.

North Wales Fire and Rescue Services Case Study

NWFRS enhances emergency response with secure intranet deployment.

NWFRS needed to upgrade their on-premises information systems. By leveraging existing Microsoft 365 licenses, NWFRS achieved streamlined workflows and improved communication without incurring extra costs.
