PROVIDING DEVELOPMENT SOLUTIONS AROUND THE MICROSOFT POWER PLATFORM INCLUDING POWER APPS, POWER BI AND POWER AUTOMATE

DATA & AI

PROVIDING AI SOLUTIONS INCLUDING FABRIC, POWER BI, AZURE PRO CODE DEVELOPMENT AND COPILOT

MANAGED SERVICES

PROVIDING MANAGED SERVICES FOR ALL THE PILLARS OUTLINED INCLUDING IT SUPPORT FOR ORGANISATIONS.

Microsoft Solutions Partners

Microsoft Solutions Partner in Modern Work

Modern Work Solution Partners have demonstrated the capabilities to deploy for SMB & Enterprise based on performance, skilling and customer success.

We also hold the less common Microsoft Adoption and Change Management Advanced Specialization, which, in short, means that our projects stand an extremely high chance of successful adoption.

Microsoft Solutions Partner in Digital & App Innovation

As a Solutions Partner for Digital & App Innovation we have demonstrated our broad capability to help customers build, run, and manage applications across multiple clouds, on premises, and at the edge.

Additionally, we hold the Low Code Application Development Advanced Specialization which includes Microsoft Power Apps and Microsoft Power Automate, to rapidly develop custom and flexible low-code line-of-business solutions.

Service Description

Summary

Valto's Azure Health Check helps organisations assess the security, performance, and governance of their Azure environment. Through an objectives-led review and expert consultancy, we provide clear recommendations to improve reliability, cost efficiency, and cloud security.

Service Details

The Azure Health Check is a structured engagement designed to evaluate an existing Azure environment against business, technical, and security objectives. Valto works with stakeholders to understand intended outcomes, current usage, and operational priorities.

Following an initial discovery session, our Azure consultants carry out a detailed assessment covering infrastructure, networking, identity, security, governance, automation, and cost management. We identify risks, misconfigurations, and performance issues that may impact resilience, scalability, or compliance.

Our approach combines technical analysis with practical operational insight. This ensures recommendations are realistic, prioritised, and aligned with how Azure services are used across the organisation.

Valto produces a detailed health check report outlining findings, risks, and prioritised recommendations. These can be actioned internally or delivered by Valto through Azure consultancy and implementation services to meet agreed objectives.

Service features

- Azure consultancy discovery and assessment workshops
- Review of Azure infrastructure and IaaS services
- Azure security and governance configuration review
- Identity and access management assessment
- Networking and connectivity evaluation
- Cost management and optimisation analysis
- Automation and monitoring services review
- Performance and resilience assessment
- Alignment with Azure best practices
- Prioritised recommendations from Azure consultants

Service benefits

- Improves security across Azure cloud services
- Reduces risk from misconfigured Azure resources
- Optimises Azure performance and reliability
- Improves cost efficiency through expert consultancy
- Aligns Azure usage with business objectives
- Strengthens governance and compliance posture
- Supports informed cloud optimisation decisions
- Enables confident internal cloud ownership
- Maximises value from Azure consultancy services
- Provides clear next steps for Azure improvement

Service constraints

The Azure Health Check is typically delivered remotely but can be delivered onsite by agreement. The service includes assessment and recommendations only and does not include remediation unless separately agreed. Access to Azure subscriptions, monitoring data, and stakeholder availability is required. Findings and recommendations reflect the environment at the time of assessment and agreed objectives.

Case Studies

Chester Zoo Case Study

Reducing waste through an efficient uniform ordering app to save money.

Chester Zoo staff members needed a way to keep track of previous orders and collections and an easier way to approve or reject any uniform related requests.

City of London Case Study

The City of London previously managed its gardens with pen and paper.

Their goal was simple: build a Microsoft Power App solution that would streamline garden management for London's fieldworkers and administrators alike. The solution would have to be easy to use, scalable, and securely available on employee mobile devices.

North Wales Fire and Rescue Services Case Study

NWFRS enhances emergency response with secure intranet deployment.

NWFRS needed to upgrade their on-premises information systems. By leveraging existing Microsoft 365 licenses, NWFRS achieved streamlined workflows and improved communication without incurring extra costs.
