Service Description

Summary

Valto's Power BI Envisioning Workshop helps organisations define how Power BI can support reporting and decision-making. Through structured discovery and expert guidance, we identify high-value reporting use cases and create a clear roadmap for effective Power BI adoption.

Service Details

The Power BI Envisioning Workshop is a structured engagement designed to help organisations understand how Power BI can be used to meet reporting and analytics objectives. Valto works with key stakeholders to explore current challenges, data sources, and desired insights.

During the workshop, we review existing reports, dashboards, and data processes. We explore Power BI capabilities including data modelling, visualisation, security, and sharing to identify where Power BI can improve visibility and decision-making.

The session combines facilitated discussions, practical examples, and real-world scenarios. This enables stakeholders to identify high-impact use cases, understand governance considerations, and make informed decisions before committing to implementation.

Following the workshop, Valto provides documented recommendations, priorities, and next steps. This includes a clear roadmap covering adoption approach, skills considerations, and phased delivery aligned to business goals.

Service features

- Stakeholder discovery and facilitated workshops
 - Power BI capability overview and demonstrations
 - Review of existing reporting and data sources
 - Use-case identification across business areas
 - Data modelling and security considerations
 - Governance and sharing approach guidance
 - Prioritisation of high-value reporting opportunities
 - Adoption and skills planning advice
 - Alignment with Power BI best practices
 - Documented recommendations and roadmap
-

Service benefits

- Aligns reporting strategy with business objectives
 - Improves visibility and data-driven decisions
 - Clarifies how Power BI delivers value
 - Reduces reliance on manual reporting
 - Improves consistency across reports
 - Supports informed investment decisions
 - Accelerates analytics planning
 - Improves stakeholder engagement with data
 - Provides a clear Power BI roadmap
 - Maximises value from Power BI investment
-

Service constraints

Access to relevant stakeholders, data documentation, and existing reports is required. Outputs are advisory and do not include report build or deployment unless separately agreed.

Case Studies

Chester Zoo Case Study

Reducing waste through an efficient uniform ordering app to save money.

Chester Zoo staff members needed a way to keep track of previous orders and collections and an easier way to approve or reject any uniform related requests.

City of London Case Study

The City of London previously managed its gardens with pen and paper.

Their goal was simple: build a Microsoft Power App solution that would streamline garden management for London's fieldworkers and administrators alike. The solution would have to be easy to use, scalable, and securely available on employee mobile devices.

North Wales Fire and Rescue Services Case Study

NWFRS enhances emergency response with secure intranet deployment.

NWFRS needed to upgrade their on-premises information systems. By leveraging existing Microsoft 365 licenses, NWFRS achieved streamlined workflows and improved communication without incurring extra costs.
