Microsoft Solutions Partner in Modern Work

Modern Work Solution Partners have demonstrated the capabilities to deploy for SMB & Enterprise based on performance, skilling and customer success.

We also hold the less common [Microsoft Adoption and Change Management Advanced Specialization](#), which, in short, means that our projects stand an extremely high chance of successful adoption.

Microsoft Solutions Partner in Digital & App Innovation

As a Solutions Partner for Digital & App Innovation we have demonstrated our broad capability to help customers build, run, and manage applications across multiple clouds, on premises, and at the edge.

Additionally, we hold the [Low Code Application Development Advanced Specialization](#) which includes Microsoft Power Apps and Microsoft Power Automate, to rapidly develop custom and flexible low-code line-of-business solutions.

Service Description

Summary

Valto's Power Automate Envisioning Workshop helps organisations identify how automation can improve efficiency and consistency. Through structured discovery and expert guidance, we define high-value automation opportunities and create a clear roadmap for Power Automate adoption.

Service Details

The Power Automate Envisioning Workshop is a structured engagement designed to help organisations understand how Power Automate can be used to streamline processes and reduce manual effort. Valto works with key stakeholders to explore current workflows, pain points, and desired outcomes.

During the workshop, we review existing processes and systems. We explore Power Automate capabilities including cloud flows, approvals, and integration with Microsoft 365 and third-party systems to identify opportunities for automation.

The session combines facilitated discussions, practical examples, and real-world scenarios. This enables stakeholders to identify high-impact automation use cases, understand governance considerations, and make informed decisions before committing to development.

Following the workshop, Valto provides documented recommendations, priorities, and next steps. This includes a clear roadmap covering adoption approach, governance considerations, and phased delivery aligned to business goals.

Service features

- Stakeholder discovery and facilitated workshops
 - Power Automate capability overview and demonstrations
 - Process review and automation opportunity identification
 - Use-case identification and prioritisation
 - Integration and connector considerations
 - Governance and security guidance
 - Automation design best practice advice
 - Adoption and skills planning support
 - Alignment with Power Platform best practices
 - Documented recommendations and roadmap
-

Service benefits

- Identifies high-value automation opportunities
 - Reduces manual effort and errors
 - Improves process efficiency and consistency
 - Aligns automation with business objectives
 - Supports informed low-code investment decisions
 - Accelerates automation planning
 - Improves productivity across teams
 - Reduces delivery risk and rework
 - Provides a clear automation roadmap
 - Maximises value from Power Automate investment
-

Service constraints

Access to relevant stakeholders, process documentation, and system information is required. Outputs are advisory and do not include automation build unless separately agreed.

Case Studies

Chester Zoo Case Study

Reducing waste through an efficient uniform ordering app to save money.

Chester Zoo staff members needed a way to keep track of previous orders and collections and an easier way to approve or reject any uniform related requests.

City of London Case Study

The City of London previously managed its gardens with pen and paper.

Their goal was simple: build a Microsoft Power App solution that would streamline garden management for London's fieldworkers and administrators alike. The solution would have to be easy to use, scalable, and securely available on employee mobile devices.

North Wales Fire and Rescue Services Case Study

NWFRS enhances emergency response with secure intranet deployment.

NWFRS needed to upgrade their on-premises information systems. By leveraging existing Microsoft 365 licenses, NWFRS achieved streamlined workflows and improved communication without incurring extra costs.
