Service Description

Summary

Valto's Power Pages Envisioning Workshop helps organisations define how Power Pages can support external-facing digital experiences. Through structured discovery and expert guidance, we identify high-value use cases and create a clear roadmap for Power Pages adoption.

Service Details

The Power Pages Envisioning Workshop is a structured engagement designed to help organisations understand how Power Pages can be used to deliver secure, scalable external websites and portals. Valto works with key stakeholders to explore objectives, audiences, and desired outcomes.

During the workshop, we review current external processes, data access needs, and user journeys. We explore Power Pages capabilities, security models, and integration with Dataverse and Power Platform to identify opportunities for improvement.

The session combines facilitated discussions, practical examples, and real-world scenarios. This enables stakeholders to identify high-impact use cases, understand design and governance considerations, and make informed decisions before committing to delivery.

Following the workshop, Valto provides documented recommendations, priorities, and next steps. This includes a clear roadmap covering adoption approach, governance considerations, and phased delivery aligned to business goals.

Service features

- Stakeholder discovery and facilitated workshops
 - Power Pages capability overview and demonstrations
 - External user journey and process review
 - Use-case identification and prioritisation
 - Dataverse and data access considerations
 - Security and authentication guidance
 - Governance and compliance planning
 - Integration with Power Platform services
 - Adoption and skills planning advice
 - Documented recommendations and roadmap
-

Service benefits

- Identifies high-value external digital opportunities
 - Improves service delivery for external users
 - Reduces reliance on manual external processes
 - Aligns portals with business objectives
 - Supports secure external data access
 - Accelerates digital service planning
 - Improves user experience and accessibility
 - Reduces delivery risk and rework
 - Provides a clear Power Pages roadmap
 - Maximises value from Power Pages investment
-

Service constraints

Access to relevant stakeholders, process documentation, and data requirements is needed. Outputs are advisory and do not include Power Pages development unless separately agreed.

Case Studies

Chester Zoo Case Study

Reducing waste through an efficient uniform ordering app to save money.

Chester Zoo staff members needed a way to keep track of previous orders and collections and an easier way to approve or reject any uniform related requests.

City of London Case Study

The City of London previously managed its gardens with pen and paper.

Their goal was simple: build a Microsoft Power App solution that would streamline garden management for London's fieldworkers and administrators alike. The solution would have to be easy to use, scalable, and securely available on employee mobile devices.

North Wales Fire and Rescue Services Case Study

NWFRS enhances emergency response with secure intranet deployment.

NWFRS needed to upgrade their on-premises information systems. By leveraging existing Microsoft 365 licenses, NWFRS achieved streamlined workflows and improved communication without incurring extra costs.
