

G-Cloud 15 Service Definition

Cyber Assurance & Resilience Services Technical Cyber Security Assurance and Incident Response

About the Service

CDS Defence & Security (CDS DS) offers risk-based cyber security design and assurance services that are proportionate and effective for your technology solutions.

Our security-cleared, cyber-certified professionals will work with you to review your existing security arrangements, before developing a prioritised plan to improve your digital resilience.

Fully aligned with UK and International standards, these services will help you to better understand your security posture and realise the full potential of your technology with the assurance that information is protected, incidents are effectively managed and the risk from threats and vulnerabilities is reduced.

- Cyber security architecture review, scoping, design and implementation
- Incident response management and training
- Cross domain assurance
- Risk assessments
- Compromise assessments
- Digital forensics capability
- Penetration testing capability
- Cyber Essentials+ accreditation & guidance

Service Features

About CDS DS

CDS DS is a trusted provider to Her Majesty's Government. For over 20 years, we have supported defence, security and intelligence customers with a wide range of capabilities that are crucial in protecting the most important information assets and intelligence systems.

Operating at all classification levels, our expertise is enriched by in-house behavioural psychologists, which will give you a human view of cyber security as well as a technical one, promising you a far more all-encompassing solution.
