

G-Cloud 15 Service Definition

Cyber Assurance & Resilience Services Training Capabilities

About the Service

Training has the biggest impact when the approach is innovative, the delivery is engaging and the content is relevant. CDS Defence & Security (CDS DS) offers innovative blended learning interventions that will educate your workforce on identifying and mitigating cyber risk, which is one of the most critical responsibilities of any employee in the modern age.

We will work with you to understand your security posture and the learning needs of your organisation and people so that training is tailored to your learners, your goals and your budget.

Our team are specialists in creating and delivering digital learning, from e-learning, animation and gamification to Augmented and Virtual Reality (AR and VR).

We use modern learning practices, such as learning analytics through xAPI, to provide opportunities to track people's learning journey. These data analytics complete the learning feedback cycle. What resources do your top performers choose to learn from? Where is everyone struggling with a concept or process? These and similar questions are fed back to the training designers to constantly improve the quality and impact of your training programme.

Our approach to training and learning is compliant with DSAT and JSP822. It is also grounded in behavioural psychology, which means we put the learner at the heart of everything we do, resulting in better, more user focused outcomes and enduring behavioural change.

Using the latest in learning concepts and technology, we will create and deliver engaging learning solutions that will:

Service Benefits

- Improve your organisation's security culture
- Instil safe behaviours in your workforce
- Improve user confidence, competence and understanding of responsibilities regarding cyber security
- Reduce the risk to your business from insider threat and cyber security breaches
- Ensure that you are up-to-date with the latest in legislation, policy and practice

About CDS DS

CDS DS is a trusted provider to Her Majesty's Government. For over 20 years, we have supported defence, security and intelligence customers with a wide range of capabilities that are crucial in protecting the most important information assets and intelligence systems.

We have a deep understanding of training and education, with a proven track record delivering successful learning interventions, which was recognised when CDS DS was shortlisted for a TES Training Provider of the Year Award alongside the British Army. This knowledge, combined with ground-breaking digital skills, allows us to develop relevant learning scenarios and game-based learning to engage users on a deeper level, stimulating critical thinking, broadening participation and encouraging group collaboration.
