Cyber Assurance & Resilience Services Risk and Governance

About the Service

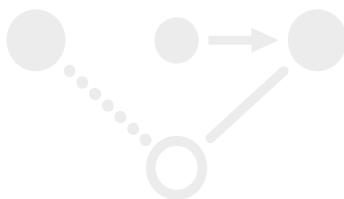

CDS Defence & Security (CDS DS) provides the insight and assurance to improve security risk management and governance in line with international frameworks, standards and approaches.

We consider both the business and IT's role in security, giving you a more rounded solution that gets the right balance between people, processes and technology – allowing you to concentrate on your core business, with the assurance that our expert team will handle the rest.

CDS DS experts can operate across all levels of your business, with both technical and non-technical stakeholders, to ensure a holistic approach when helping to introduce whatever changes are needed to optimise your operational effectiveness.

Security-cleared, cyber-certified professionals will work with you to review your existing security arrangements, before developing a prioritised plan or strategy to improve or assure your digital resilience.

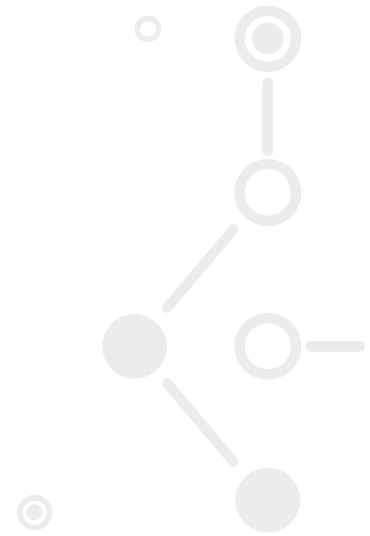

CDS DS prides itself on our collaborative flexible approach: our expert team can mobilise quickly to work from your facility or from our own security-approved offices.

- Leadership, management & competency consultancy
- Governance and technology strategies
- Review or development of policies, processes and procedures
- Assessment of organisation culture
- Development & delivery of training and awareness-raising
- Information security risk assessments or triage (including physical security)

- Supply chain security assessments

Service Features ○

About CDS DS

CDS DS is a trusted provider to Her Majesty's Government. For over 20 years, we have supported defence, security and intelligence customers with a wide range of capabilities that are crucial in protecting the most important information assets and intelligence systems.

Operating at all classification levels, our expertise is enriched by in-house behavioural psychologists, which gives you a human view of cyber security as well as a technical one, promising you a far more all-encompassing solution.
