

G-Cloud 15 Service Definition

Cyber Assurance & Resilience Services Programme Capabilities

About the Service

Cyber threats are a risk to every part of an organisation; from minor infractions to incidents that have significant operational and financial impacts.

CDS Defence & Security (CDS DS) are experts in designing, implementing and operating highly regarded cyber security and technology programmes that maximise digital resilience.

From the outset, we will work with you to determine your needs and implement a plan that meets your objectives and budget.

We can provide a security-cleared team of experts to design and manage your cyber security technology programmes on your behalf, from architecture, through implementation and operation, to monitoring and maintenance. Alternatively, we can quickly mobilise individual specialists to embed within your team either on your premises or working from our own government-approved secure offices.

- Cyber security programme and project management
- Cyber security transformation
- Implementation and operation of cyber technologies
- Specialist Insider Threat monitoring and detection
- Fully aligned with HMG and International policy and standards
- End to end managed cyber security programme capabilities

Service Features

About CDS DS

CDS DS is a trusted provider to Her Majesty's Government. For over 20 years, we have supported defence, security and intelligence customers with a wide range of capabilities

that are crucial in protecting the most important information assets and intelligence systems.

Operating at all classification levels, our programme experience includes niche expertise of insider threat detection and monitoring technologies and operations in sensitive environments. Expertise is enriched by in-depth knowledge of behavioural psychology, which will give you a human view of cyber security as well as a technical one, promising you a far more all-encompassing solution.

- Better understanding of your security posture
- Maximised digital resilience
- Reduced cyber security and information risk
- Full benefit from your technology and cyber security investments
- Reduced cyber security costs and burden
- Improved user commitment, understanding, competence and trustworthiness
- Truly agnostic technology support, unallied to any software or hardware
- Solutions that are tailored to your goals and budget
