ABOUT US

At Barrier, our mission is to help our customers build cyber resilience and develop strategies to defend against cyber-attacks. We have developed a portfolio of services and solutions that suit customers small and large, in both the private and public sector. Our portfolio encompasses security consultancy, solutions from innovative vendors to mitigate attacks, through to managed services that proactively detect attacks and provide swift incident response measures.

We have built a practice dedicated to providing assurance that systems are resilient to attack. We provide penetration testing services to check the effectiveness of the deployed controls against real-world attacks, and we can implement a vulnerability management system to maintain levels of operational resilience.

Our aim is to build trust and understanding of how our customers' organisation functions. Our work takes us across all sectors, with strong references in the Finance Sector, Data Hosting, Legal, Local Government, MOD, and the wider Public Sector.

Established in 2006, we are a cybersecurity-focused solutions and service provider. Our customers trust Barrier as a strategic part of their cybersecurity team and here's why:

- Our knowledge of the cybersecurity industry helps select the right solutions
- Our experience helps organisations build cohesive cyber resilience strategies
- Our people are empowered to work closely with our customers to forge strong partnerships
- Our services become an intrinsic part of our customer's security operations
