

DICT8

Pricing Document

All prices are subject to VAT

Subject to contract and commercial in confidence

Outsourced Transcription

We charge 18p per 67-characters typed (this is the AMSPAR definition of a line).

There are no other charges such as training, software, integrations, support etc.

There are no monthly minimums and it can be used as much or as little as required

Workflow Management

If the workflow management system is used **without** the use of DICT8 outsourced transcription then there is a charge of £20 / secretary / month

Please note that any charges for the digital dictation workflow management system are allowable against outsourced transcription. Thus, for example, if there was a charge for £500 in a month for workflow management then this would be a £500 credit against the cost of outsource transcription during the month and the workflow management system would effectively become Free of Charge for that month if over £500 of outsource transcription were done.
