

Patchwork

HR AI Assistant

Service description

An AI-powered HR ChatBot enhancing staff engagement and internal communications. Featuring a chat interface, PDF viewer, and feedback loops, it streamlines policy updates and reaches hard-to-contact workers. Reduce email reliance and gain measurable insights via an activity dashboard to ensure effective, data-driven organizational connectivity and frontline support.

Service features and benefits

| SERVICE FEATURES

Chat Interface

Activity Dashboard

PDF Viewer

Feedback

| BENEFITS

- Mimics your usual chat messaging experience. Ask a question, and the chatbot thinks and responds through text in the interface. AI Chatbot responses link to the relevant text.
- After a response has been given by the AI Chatbot, the answer will have a link to the relevant text and link to the full PDF document via PDF viewer.
- Users can provide feedback on answers, stored in the activity log.
- Chat sessions are logged and visible as full transcripts in an Admin Dashboard. Upvotes, downvotes, and comments are all visible here against each response.
