

AI Translation Service for UK Public Sector

Advanced AI-powered multilingual translation for government communications

Secure cloud translation for diplomatic and policy documents

Faster international communication

Accelerate cross-border engagement with instant access to translated documents.

Lower translation costs

Reduce reliance on manual translation through automated AI-driven multilingual processing.

Improved diplomatic accuracy

Support better diplomatic relations with accurate, culturally sensitive translations.

Transform Public Services

- Purpose-built for UK public sector diplomatic, policy, and official communication use cases.
- Combines advanced AI translation with strong quality assurance for context-aware outputs.
- Delivers secure, GDPR-compliant, audited translation on UK/EEA infrastructure.
- Integrates with existing email, document management, and collaboration platforms via API.

Service Overview

This service delivers rapid, accurate AI-driven translation for UK public sector organisations, covering diplomatic documents, policy papers, and international correspondence. It is cloud-based, designed for secure data handling, GDPR compliance, and seamless integration with existing government systems.

Core Capabilities

- High-accuracy AI translation for complex diplomatic and policy language
- Real-time multilingual translation across 100+ languages
- Secure, compliant cloud deployment with multi-cloud support (public, private, community, hybrid)

Key Features

Advanced AI-powered translation technology for diplomatic document processing

Real-time translation supporting over one hundred global languages

Secure cloud infrastructure meeting UK government security compliance standards

Multi-format support including PDFs, Word documents, and Excel files

API integration for seamless connection to existing communication and document systems

Quality assurance protocols for accurate, contextually appropriate translations

GDPR-compliant data handling with full audit trails

Automated workflow management to reduce manual intervention and processing time

Service Benefits

Faster international communication

Accelerate cross-border engagement with instant access to translated documents.

Lower translation costs

Reduce reliance on manual translation through automated AI-driven multilingual processing.

Improved diplomatic accuracy

Support better diplomatic relations with accurate, culturally sensitive translations.

Stronger compliance and security

Ensure compliant handling of sensitive information with UK government-approved secure data handling and GDPR-aligned controls.

Consistent multilingual content

Maintain consistent terminology across documents with standardised terminology management and audit trails.
