

Real-Time Hyper-Relevant Information Access for UK Public Sector

Real-time insight platform for UK public sector decision-makers

Multi-source, AI-powered information access for councils, NHS and government bodies

Better Decisions, Faster

Access accurate, timely data to enhance public sector decision-making and reduce uncertainty.

Time and Effort Savings

Rapid information retrieval significantly reduces research and data-gathering time for teams.

Stronger Collaboration

Share relevant insights with colleagues to promote more effective teamwork and cross-functional

Transform Public Services

- Purpose-built to give UK public sector teams hyper-relevant, real-time information for better decisions
- Aggregates and normalises data from many reliable sources into a single, easy-to-use dashboard
- Uses advanced algorithms and personalisation to surface only the most relevant insights for each user
- Supports a wide range of public sector domains, from councils to NHS and central government bodies

Service Overview

This service is a real-time information access platform that transforms how UK public sector organisations retrieve and use data. It aggregates data from multiple internal and external sources, applying advanced algorithms to deliver hyper-relevant, contextual insights to users across councils, NHS and central government.

Core Capabilities

- Real-time aggregation of data from multiple trusted internal and external sources
- Advanced search and retrieval algorithms for hyper-relevant, contextualised insights
- Unified, dashboard-based access to information across public sector domains

Key Features

Real-time data updates

Up-to-the-minute data updates for public sector organisations

Tailored results

Results personalised to user needs, contexts, preferences and settings

Daily aggregation

Aggregation from multiple reliable internal and external data sources

Multimedia delivery

Information delivered in text, charts and multimedia formats

Sophisticated algorithms

Efficient data retrieval and search capabilities

Unified dashboard

Accessible dashboard consolidating information from multiple sources

Cross-domain insights

Insight access across various public sector areas

Personalised search

Search result delivery aligned to operational requirements

Service Benefits

Better Decisions, Faster

Access accurate, timely data to enhance public sector decision-making and reduce uncertainty.

Time and Effort Savings

Rapid information retrieval significantly reduces research and data-gathering time for teams.

Stronger Collaboration

Share relevant insights with colleagues to promote more effective teamwork and cross-functional collaboration.

More Innovative Thinking

Diverse data sources and formats encourage new ideas and fresh perspectives in policy and service design.

Improved Risk and Service Management

Up-to-date data helps identify issues earlier, stay on top of critical information and reduce risk exposure.

Summary & Key Advantages

Why Choose This Service

- Purpose-built to give UK public sector teams hyper-relevant, real-time information for better decisions
- Aggregates and normalises data from many reliable sources into a single, easy-to-use dashboard
- Uses advanced algorithms and personalisation to surface only the most relevant insights for each user
- Supports a wide range of public sector domains, from councils to NHS and central government bodies
- Improves efficiency, collaboration and innovation while helping manage risk through continuous, up-to-date insight
