Transform Public Services

- Purpose-built for UK public sector, including councils, NHS, agencies and educational institutions.
- Combines AI-driven analysis with strong security controls (encryption, RBAC, certified datacentre standards, annual
- Integrates as both a standalone platform and an add-on to existing government procurement and ERP systems.
- Delivers full auditability with configurable audit trails, user activity logs and exportable data in open formats

Service Overview

This service is an AI-powered contract analysis and compliance platform that automates review of public sector contracts, extracting key terms, obligations and risks for UK organisations. It accelerates procurement processes, reduces legal workload and costs, and provides full auditability for councils, NHS bodies and government departments. Running on scalable, secure cloud infrastructure, it integrates with existing procurement, ERP and document management systems across public, private, commu...

Core Capabilities

- Automated extraction of key clauses, terms, obligations and dates from contract documents
- Real-time risk and compliance assessment against UK public procurement regulations
- Centralised dashboards, reporting and audit trails for contract governance and decision-making

Key Features

AI-powered contract analysis that automatically extracts key terms and obligations.

Real-time risk assessment to identify compliance issues within contract documents.

Advanced encryption for secure handling of sensitive government contract data.

Customisable dashboards providing comprehensive contract insights and analytics.

API integration with public sector procurement, ERP and document management systems.

Role-based access controls with granular user permissions.

Automated compliance monitoring for UK public procurement regulations.

Scalable multi-cloud deployment (public, private, community, hybrid) for growing workloads.

Service Benefits

Reduced Manual Workload

Cuts time spent on manual contract review, freeing commercial and legal teams for higher-value strategic activities.

Improved Procurement Efficiency

Provides real-time visibility and analysis of contracts, shortening procurement and approval cycles.

Stronger Compliance & Governance

Helps ensure adherence to UK government procurement regulations and audit requirements with robust audit trails.

Enhanced Risk Management

Improves detection of contractual, financial and regulatory risks, reducing exposure to disputes and liabilities.

Actionable Insights & Cost Savings

Surfaces opportunities for savings and efficiency through analytics on contract terms, utilisation and performance.

Summary & Key Advantages

Why Choose This Service

- Purpose-built for UK public sector, including councils, NHS, agencies and educational institutions.
- Combines AI-driven analysis with strong security controls (encryption, RBAC, certified datacentre standards, annual penetration testing).
- Integrates as both a standalone platform and an add-on to existing government procurement and ERP systems.
- Delivers full auditability with configurable audit trails, user activity logs and exportable data in open formats (CSV, JSON, XML).
- Backed by tiered UK-based support, WCAG 2.2 AA compliant interfaces and documented SLAs for availability and performance.
