Transform Public Services

- Purpose-built for UK public sector bodies (councils, NHS, police, central government) with relevant policy sources
- Combines aggregation, search, alerts and AI analysis in a single SaaS platform rather than relying on fragmented
- Provides real-time, actionable insights instead of raw document feeds, supporting strategic, operational and
- Operates on secure, GDPR-compliant UK/EEA cloud infrastructure with strong data protection measures

Service Overview

This service automatically harvests and aggregates government policy documents and related news for the UK public sector, then applies AI to synthesise and analyse that information. It delivers real-time insights, competitive and legislative intelligence, and supports strategic alignment and compliance across councils, the NHS, police forces and government departments.

Core Capabilities

- Continuous aggregation of government policy documents, news and legislative updates from authoritative sources
- Automated AI-driven analysis to extract themes, insights and trends across multiple policy documents
- Real-time alerting and dashboard views tailored to specific organisations, sectors and stakeholders

Key Features

AI-powered policy document aggregation

Aggregation from government sources on a daily basis

Real-time news and legislative tracking

For UK public sector organisations

Automated policy analysis

Synthesising key themes across multiple documents

Natural language processing

Extract actionable insights from unstructured policy text

Customised alert system

Delivering relevant policy and legislative updates to defined stakeholder groups

Integrated search and knowledge discovery

Find related policies and regulations

Historical policy comparison

Track legislative changes and regulatory developments over time

GDPR-compliant secure cloud platform

For storing and managing sensitive policy intelligence

Service Benefits

Always-on policy awareness

Keeps organisations informed about policy and regulatory changes affecting the public sector across the UK, reducing blind spots and surprises

Time and cost savings

Significantly reduces staff time spent manually monitoring multiple news sources, portals and publications for relevant policy updates

Evidence-based decision-making

Provides comprehensive analysis and actionable insights so leaders can base decisions on a complete, up-to-date view of the policy landscape

Continuous compliance support

Surfaces legislative and regulatory updates so teams can maintain compliance with evolving requirements and standards

Faster policy implementation

Streamlines access to intelligence and trend analysis, enabling quicker interpretation of changes and more efficient rollout of policy responses

Stronger stakeholder communication

Aggregated briefings and trend views help policy, communications and leadership teams maintain a consistent, informed narrative
