Service Overview

This service is a digital archival platform for UK public sector arts, museums, and cultural heritage organisations, providing secure cloud storage and preservation of digital collections. It streamlines collection management, metadata, and workflows while improving public access and compliance with UK archival and data protection standards.

Core Capabilities

- End-to-end digital archiving of cultural collections, from ingestion to long-term preservation
- Metadata management aligned with Dublin Core and UK archival standards
- Public access portal for online discovery and engagement with collections

Key Features

Secure cloud storage

Dedicated cloud storage for digital collections and cultural heritage assets with UK data sovereignty

Metadata management

Compliant with Dublin Core and UK archival standards for consistent cataloguing

Digital preservation workflows

Supporting long-term accessibility and preservation of cultural artefacts

Public access portal

Community engagement platform for online discovery of cultural collections

Multi-format support

Comprehensive support for images, audio, video and archival documents

Role-based access controls

Granular permissions for sensitive collections and donor information

API-based integration

Seamless integration with collection management and cataloguing systems

Automated backup and disaster recovery

Continuous heritage protection with automated backup processes

Service Benefits

Long-term cultural preservation

Preserves cultural heritage for future generations through secure digital archiving and preservation workflows

Operational efficiency & cost reduction

Reduces operational costs via automated workflows and managed cloud infrastructure

Public access & engagement

Improves public engagement by enabling wider online access to UK cultural collections

Governance & accountability

Enhances accountability with comprehensive audit trails, version control, and activity logging

Collaboration & research enablement

Enables remote collaboration between museum staff, partners, and researchers, and supports research and education through searchable digitised archives

Summary & Key Advantages

Why Choose This Service

- Designed specifically for UK public sector arts, museums, archives, galleries and heritage sites, aligned with national cultural preservation goals
- Supports UK data sovereignty and GDPR compliance with data stored in the UK/EEA and strong encryption in transit and at rest
- Offers flexible cloud deployment (public, private, community, hybrid) and multi-cloud support across major providers
- Delivers strong support model with multiple channels (email, phone, web chat) and tiered support options tailored to public sector needs
- Integrates with existing collection management, library catalogues, and access platforms to extend rather than replace current systems
