Reduced workload and errors

Eliminate manual note-taking to lower staff workload and reduce transcription errors

Transform Public Services

- Purpose-built for UK public sector including NHS, councils, central government and public agencies
- Delivers rapid productivity gains by automating summarisation and minutes across high-volume workloads
- Provides robust security, UK/EEA data residency, encryption in transit and at rest
- Flexible multi-cloud deployment with scalable, multi-tenant architecture and resource isolation

Service Overview

This service provides AI-driven summarisation of public sector documents and automated production of meeting minutes from live discussions, tailored for NHS bodies, councils, central government and public agencies. It reduces manual effort, improves transparency, and supports decision-making with secure, compliant processing and storage of sensitive information in UK and EEA data centres.

Core Capabilities

- Real-time summarisation of documents from multiple government data sources
- Automatic generation of structured meeting minutes from live discussions
- Secure, compliant storage and processing of sensitive public sector documents with UK/EEA residency

Key Features

Real-time document summarisation

Summarise documents from multiple government data sources in real time

Automatic meeting minutes generation

Generate structured minutes directly from live discussions

Secure, compliant storage

Secure storage for sensitive public sector documents with UK/EEA data residency

Multi-cloud deployment

Support for public, private, community and hybrid cloud models

Seamless integration

Integration with government collaboration and productivity tools

Scalable processing

Handle high-volume document and meeting workloads efficiently

Role-based access controls

Protect agency and departmental data with granular permissions

UK Government standards-aligned

Security and data privacy controls aligned with UK government standards

Service Benefits

Time-saving automation

Save time producing accurate minutes by replacing manual note-taking with automated capture and structuring

Faster decisions

Improve document accessibility and insight for quicker, better-informed decisions

Reduced workload and errors

Eliminate manual note-taking to lower staff workload and reduce transcription errors

Stronger compliance and security

Strengthen regulatory compliance with GDPR-compliant handling and UK/EEA data residency

Transparency and collaboration

Enhance transparency, accountability and cross-agency collaboration through unified, auditable records

Summary & Key Advantages

Why Choose This Service

- Purpose-built for UK public sector including NHS, councils, central government and public agencies
- Delivers rapid productivity gains by automating summarisation and minutes across high-volume workloads
- Provides robust security, UK/EEA data residency, encryption in transit and at rest
- Flexible multi-cloud deployment with scalable, multi-tenant architecture and resource isolation
- Accessible, browser-based interface with WCAG 2.2 AA compliance and strong user support
- Supports digital transformation strategies by integrating with existing collaboration tools
