Self-serve Portal

G-Cloud 15 Service Definition

Lot 1a: Infrastructure as a Service (IaaS) and Platform as a Service (PaaS)

Self-serve Portal

Service Description

Rowden's Self-serve Portal allows any authorised users to deploy scalable, secure cloud applications effortlessly. Authorised users can tailor configurations, available services, and security via their team or ours. Manage, monitor, and scale with ease, benefiting from transparent, itemised billing and comprehensive yet intuitive administrative tools.

Features

- Pre-configurable: Pre-configure secure cloud applications, ready to deploy.
- Scalability Built In: from 10s to 1000s of users automatically.
- Managed Security: customisable by user or Rowden experts.
- Persistent Monitoring: Offers round-the-clock logging and monitoring with archive options.
- Dashboards: Comprehensive user and administrator reporting.
- Observability: Real-time monitoring and metrics.
- FinOps: Transparent itemised billing system, per user or per service.
