ML Ops Assurance Pipeline

G-Cloud 15 Service Definition
Lot 2b: Software as a Service (SaaS)

ML Ops Assurance Pipeline

Service Description

Rowden's Assurance Pipeline Service melds automated ML deployment with scalability, boosting efficiency through features such as automated data prep and orchestration. It supports custom architectures, speeds up model launches with CI/CD, and secures operations with detailed logging. Optimising costs and performance, it's perfect for effortlessly crafting top-tier ML environments.

Features

- Custom Integration: Integrates into existing solutions managed through IaC.
- Data Integrity: Automated data preparation and validation.
- Orchestration: Package and ship into machines.
- Compute: Reduce, optimise cost and performance.
- Automate Everything: From data ingestion to insights. Continuous/frictionless.
- Seamless Collaboration: Collaborative across the ML resource chain.
- Secure Acceleration: Leveraging CI/CD increase speed of release, supported, secure.
- Audit Trail: Logging and tracking of user activity for security/audit.
- Customisable Architecture: Use the tool you want .
- Low-code ML: simplifies and accelerates machine learning development and deployment.
