Data Analytics

Service Description

Rowden's Data Analytics Service offers an all-encompassing cloud analytics tool, merging varied data for live, dynamic analysis. It safeguards data integrity via replication and virtualisation, underpinned by solid observability for system dependability. Augmented by automated processing and strict governance, our secure platform is scalable, cutting operational expenses and streamlining workflow.

Features

- Integrated Sources: Seamlessly integrates with existing and new data tools.
- Interactive Data Discovery: Enables real-time analytics through visual exploration interfaces.
- Data Replication and Virtualisation: Ensures consistent, accessible, and integrated information.
- Data Observability: Provides system-wide visibility, monitoring, and diagnostics.
- Data Management Tooling: Manages accessibility, quality, and security of data.
- Integrated Analytics: Centralises control of analytics processes in one tool.
- Variable Storage Solutions: Offers data warehousing and lakehouse options.
- Real-Time Analytics: Delivers instant insights across various data types.
- Automated Data Transformation: Streamlines analytics with automated modelling and transformation.
- Comprehensive Security: Facilitates legal and regulatory compliance.
