1 Introduction

TRL was established in 1933 within the British Government as the UK's Transport Research Laboratory and was subsequently privatised in 1996. Today, TRL has more than 1,000 clients across 145 countries, driving positive societal and economic benefit worldwide.

Much of our research leads to the development of innovative software solutions, covering transport issues at all scales both in the UK and internationally. We develop powerful software that is based on solid, proven research, yet is easy and practical to use. At the same time as we are continually developing new software based on cutting-edge research, well established products such as iMAAP, iROADS, ARCADY, PICADY, TRANSYT, SCOOT and MOVA are used by hundreds of authorities, consultants and engineers around the world.

All our products are built to around industry standard quality procedures and comply with latest data protection standards which are continually monitored and externally checked. TRL also provides full support, maintenance and training programmes for all its software products.

2 iROADS structure

iROADS is a comprehensive road and asset management platform offering multiple features to a highway authority delivering modules for **Tactical**, **Operational** and **Strategic** operations. Features and modules can interoperate to enable a highways authority to manage data, report outcomes and enable user access.

3 Pricing Schedule

3.1 SaaS Price (Annual Subscription)

Module	Features	Per year (unlimited users)
iROADS – Strategic	Strategic Decision Analysis and Asset Valuation	£32,000
iROADS – Operational	Reactive Maintenance/Inspection Scheduling, iROADS Mobile, Streetworks Permitting	£32,000
iROADS - Tactical	Pavement Scheme Optioneering, Maintenance Programming, Pavement Data Analysis	£32,000

Pricing represents maximum 3 features per module area. Further features can be configured from within the iROADS feature suite. Contact TRL for a configuration and pricing that suits your requirements

Note:

- Prices include unlimited users for the Local Highways Authority to which the product is licenced (including contractors working in the LHA and LHA employees)
- Includes users using the mobile application
- Includes data allowance up to a cap of 1TB

3.2 Initial Setup

TRL will work with new clients to understand configuration requirements and set up of dedicated instance of iROADS. This will include user configuration, system set up and amount of existing data to be imported (as well as data models). Operational and business processes can also be incorporated.

3.3 Implementation and training

All implementation and training fees will be priced using our day rate table below.
