1 Introduction

TRL was established in 1933 within the British Government as the UK's Transport Research Laboratory and was subsequently privatised in 1996. Today, TRL has more than 1,000 clients across 145 countries, driving positive societal and economic benefit worldwide.

Much of our research leads to the development of innovative software solutions, covering transport issues at all scales both in the UK and internationally. We develop powerful software that is based on solid, proven research, yet is easy and practical to use. At the same time as we are continually developing new software based on cutting-edge research, well established products such as iMAAP, iROADS, ARCADY, PICADY, TRANSYT, SCOOT and MOVA are used by hundreds of authorities, consultants and engineers around the world.

All our products are built to around industry standard quality procedures and also comply with latest data protection standards which are continually monitored and externally checked. TRL also provides full support, maintenance and training programmes for all its software products.

2 Pricing Schedule

2.1 SaaS Price (Annual Subscription)

Product	Modules	Up to 20 Users per Organisation/Year	Up to 50 users per Organisation/Year
iMAAP - Standard	Crash Recording & Analysis	£26,400	£33,000
iMAAP - Advanced	Crash Recording & Analysis & Collision Diagram, Cost Benefit, Before/After, Sliding Scale	£33,000	£46,200

2.2 Initial Setup

TRL will work with new clients to understand configuration requirements and set up of dedicated instance of iMAAP. This will include user configuration, system set up and amount of existing data to be imported (as well as data models). Operational and business processes can also be incorporated.

2.3 Implementation and Training

All implementation and training fees will be priced using our day rate table below.
