7. **Konsolute Reflekt:** Microsoft 365 Governance and Lifecycle Automation
8. **Konsolute:** Incident Reporting and Management System (IMS) for Microsoft 365
9. **Konsolute:** ISO Certified Quality Management System (QMS)

Konsolute Directory: Organisation Directory and Skills Discovery for Microsoft 365

Enables staff to easily find colleagues, expertise, skills, roles, interests, and project histories across the organisation. Designed for government and public-sector teams, it helps bring skills together, improves collaboration, accelerates knowledge sharing, and supports effective workforce planning while enhancing organisational visibility, resilience, operational efficiency, and data-driven decision-making at scale

Konsolute Directory: Organisation Directory and Skills Discovery for Microsoft 365

Features of this product

- **Integrates with Microsoft Teams** using AI-driven Microsoft Graph insights
- **Connects internal and external users** using intelligent people discovery
- **Provides administrative tools** with AI-assisted directory categorisation
- **Enables advanced AI-powered search** across people, skills, and roles
- **Enhances cross-tenant synchronisation** using automated data matching
- **Supports configurable cross-tenant interactions** with AI-informed governance
- **Delivers intuitive navigation** using relevance-based AI ranking
- **Integrates with Teams** to chat, call, and view AI-enriched profiles
- **Offers customisable views** informed by usage patterns
- **Efficiently supports large organisational structures**

Konsolute Directory: Organisation Directory and Skills Discovery for Microsoft 365

Benefits of this product

- **Enables proven discovery** of users across the organisation
- **Improves discoverability** for internal and external users, supporting collaboration
- **Provides easy access** to employee and guest profile information
- **Supports intuitive directory categorisation**, improving visibility and navigation
- **Reduces administrative effort** through proven, effective user management
- **Supports remote and hybrid working**, enabling consistent collaboration
- **Delivers consistent user experience** across Microsoft 365 applications
- **Integrates with Microsoft Teams** for calling and messaging
- **Displays rich user profile information** to support collaboration
- **Proven to enhance cross-team collaboration** through improved people discoverability

Konsolute HSEQ:

Health, Safety, Environment & Quality system for Microsoft 365

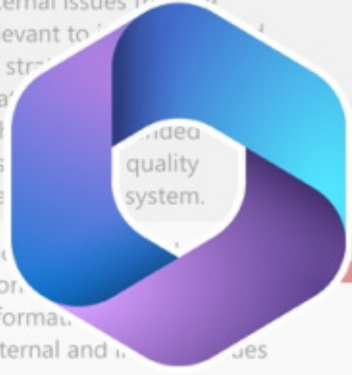

Our HSEQ platform integrates with Microsoft 365 to streamline health, safety, environment, and quality management. This GDS-compliant system enables consistent reporting, investigations, and compliance workflows, improving visibility and collaboration. It provides robust assurance across public sector organisations, replacing legacy silos with automated, data-driven HSEQ governance and reporting

Konsolute HSEQ: Health, Safety, Environment & Quality system for Microsoft 365

Features of this product

- **Seamlessly works within Teams, Outlook, and SharePoint environments**
- **Single interface** for safety, environmental, and quality data
- **Streamlined processes** for RIDDOR, ISO, and statutory reporting
- **Conduct audits and capture evidence** on any mobile device
- **High-level executive dashboards** for instant risk visibility
- **Integrated assessments** for workplace, COSHH, and fire safety
- **Systematic management** of corrective and preventive action cycles
- **Tools to track carbon footprint** and sustainability goals
- **Accessible design** ensuring high adoption across diverse workforces
- **Data residency guaranteed** within sovereign UK-based data centres

Konsolute HSEQ: Health, Safety, Environment & Quality system for Microsoft 365

Benefits of this product

- **Significant savings** by leveraging existing Microsoft licensing
- **Eradicate data silos** for a single safety truth
- **Stay compliant** with evolving HSE and environmental laws
- **Automate manual paperwork** to focus on strategic prevention
- **Data-driven insights** to prioritise safety and quality investments
- **Immutable audit trails** protect against liability and claims
- **Faster implementation** than complex legacy EHS alternatives
- **Flexible architecture** grows with your departmental requirements
- **User-friendly tools** encourage proactive near-miss and hazard reporting

Konsolute ISO Compliance Accelerator:

Automate and Simplify ISO Compliance for Microsoft 365

Our Microsoft 365 native solution automates ISO compliance and quality governance. This GDS-compliant system streamlines audits and self-assessment checklists for ISO 9001, 27001, and 45001. Leveraging your existing Microsoft 365, it ensures consistent standards and robust data sovereignty, replacing manual spreadsheets with automated, enterprise-grade quality management and real-time assurance

Konsolute ISO Compliance Accelerator: Automate and Simplify ISO Compliance for Microsoft 365

Features of this product

- **Automated compliance** within existing Teams and SharePoint environments
- **Rapid deployment** of 9001, 27001, and 14001 frameworks
- **Automated scheduling** and execution of internal quality audits
- **Secure management** of policies, SOPs, and quality manuals
- **Instant visibility** into certification readiness and compliance gaps
- **Systematic management** of corrective and preventive actions
- **Centralised, audit-ready storage** for all compliance-related records
- **Ensures documents remain valid** with proactive expiry notifications
- **High-accessibility design** following government digital service standards
- **Data stays within your secure UK-based Microsoft tenancy**

Konsolute ISO Compliance Accelerator: Automate and Simplify ISO Compliance for Microsoft 365

Benefits of this product

- **Reach ISO standards faster** with pre-built digital frameworks
- **Lower costs** by using existing Microsoft 365 licensing
- **Maintain compliance** throughout the year, not just pre-audit
- **Replace fragile spreadsheets** with robust, automated workflows
- **Consistent standards** across complex, multi-site public organisations
- **Proactively identify failures** before they impact service delivery
- **Near real-time Power BI reporting** for senior leadership assurance
- **Familiar Microsoft tools** require minimal staff training
- **Inherits enterprise-grade protection** from your Microsoft ecosystem
- **Configurable architecture** that adapts to changing international standards

Konsolute Kolumbus: Data Discovery and Intelligent Taxonomy

Master your organisational data with Konsolute Kolumbus, the data discovery and visualisation tool. We help government departments identify, analyse, and structure vast datasets across on-premises and cloud environments. By automating taxonomy generation and semantic analysis, Kolumbus simplifies data migration, strengthens information governance, and ensures data is accurately classified and secured

Konsolute Kolumbus: Data Discovery and Intelligent Taxonomy

Features of this product

- **Advanced data discovery** and visualisation for large datasets
- **Semantic analysis** powered by Natural Language Processing (NLP)
- **Intelligent keyword extraction** for automated metadata tagging
- **Seamless integration with Microsoft 365 and Azure** applications
- **Customisable dashboards** for real-time data management oversight
- **Automated taxonomy generation** to structure unorganised data
- **Compliance and security management** for Information Assurance
- **Discovery of on-premises data** including file shares and legacy systems
- **Insightful analytics** to support data-driven decision-making
- **Secure data protection** through automated sensitivity content labelling

Konsolute Kolumbus: Data Discovery and Intelligent Taxonomy

Benefits of this product

- **Streamlines data analysis** by interpreting complex information automatically
- **Enhances decision-making** for complex cloud migration projects
- **Improves data governance** through accurate Information Architecture mapping
- **Facilitates efficient archiving** by identifying redundant or obsolete data
- **Strengthens data security** via granular access control insights
- **Discover legacy data** from SharePoint, OpenText, and Documentum
- **Reduces migration risk** by surfacing hidden sensitive data
- **Optimises storage costs** by consolidating structured and unstructured data
- **Speeds up discovery** across distributed file share environments
- **Ensures regulatory compliance** with NCSC-aligned data discovery

Konsolute Onboard: Microsoft 365 New Hire Transformation

Revolutionise your joiner experience with Konsolute Onboard, the onboarding platform built for Microsoft 365. We help government organisations automate the transition from candidate to productive employee by delivering tailored induction journeys. Integrating mandatory training, policy compliance, and community discovery, we reduce new hire turnover and accelerate time-to-productivity

Konsolute Onboard: Microsoft 365 New Hire Transformation

Features of this product

- **Tailored onboarding journeys** by department, role, or business unit
- **Mandated compliance tracking** for policies, procedures, and safety videos
- **Intelligent community recommendations** for Teams, Viva, and SharePoint
- **Hiring manager dashboard** for personalising and monitoring hire progress
- **Unified portal experience** built entirely on the Microsoft 365 stack
- **Automated profile enrichment** using Microsoft Entra ID and Delve
- **Interactive task checklists** and progress visualisation for new hires
- **Administrative template wizard** for rapid, consistent onboarding deployment
- **Engagement analytics** to measure onboarding effectiveness and completion rates
- **Mobile-responsive interface** for accessible onboarding across all devices

Konsolute Onboard: Microsoft 365 New Hire Transformation

Benefits of this product

- **Reduces new hire turnover** through a professional, structured welcome
- **Eliminates manual induction** by automating mandatory training workflows
- **Speeds up productivity** by connecting hires to relevant experts
- **Strengthens regulatory compliance** with audit-ready completion records
- **Increases employee engagement** via intelligent community and social discovery
- **Minimises administrative friction** through seamless Microsoft 365 integration
- **Improves moral and culture** with a personalised, welcoming experience
- **Optimises hiring manager time** using pre-configured onboarding templates
- **Protects data privacy** by keeping all information on your tenant
- **Scales recruitment operations** to support high-volume departmental joining cycles

Konsolute Records Manager: Simplify, Automate and Streamline Records Management for Microsoft 365

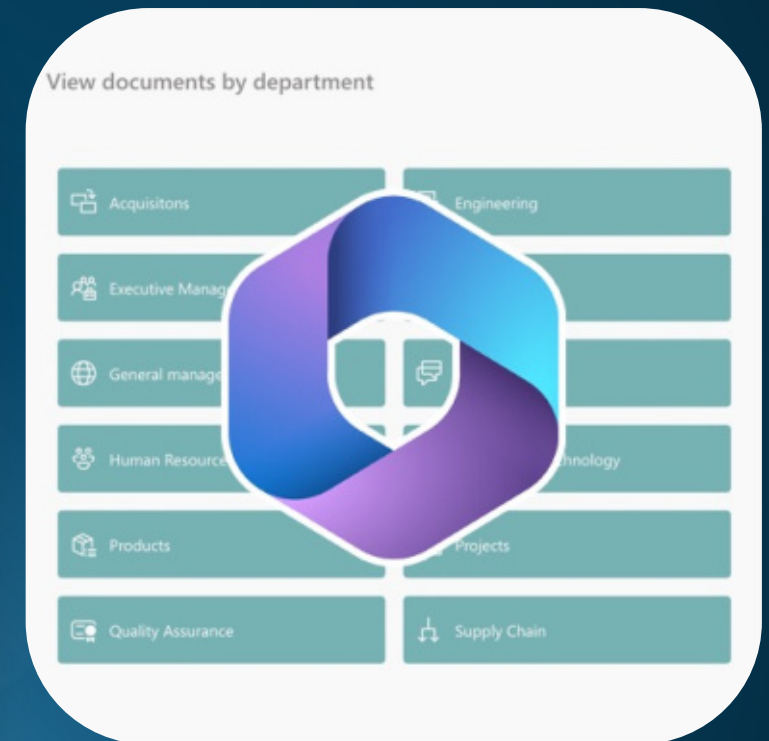

Streamline compliance with our Microsoft 365-native records management solution. Integrated menus allow users to seamlessly transfer documents to secure Record Centres without leaving their workspace. This GDS-compliant tool ensures automated retention, legal admissibility, and robust information governance, replacing manual filing with effortless, "one-click" lifecycle management

Konsolute Records Manager: Simplify, Automate and Streamline Records Management for Microsoft 365

Features of this product

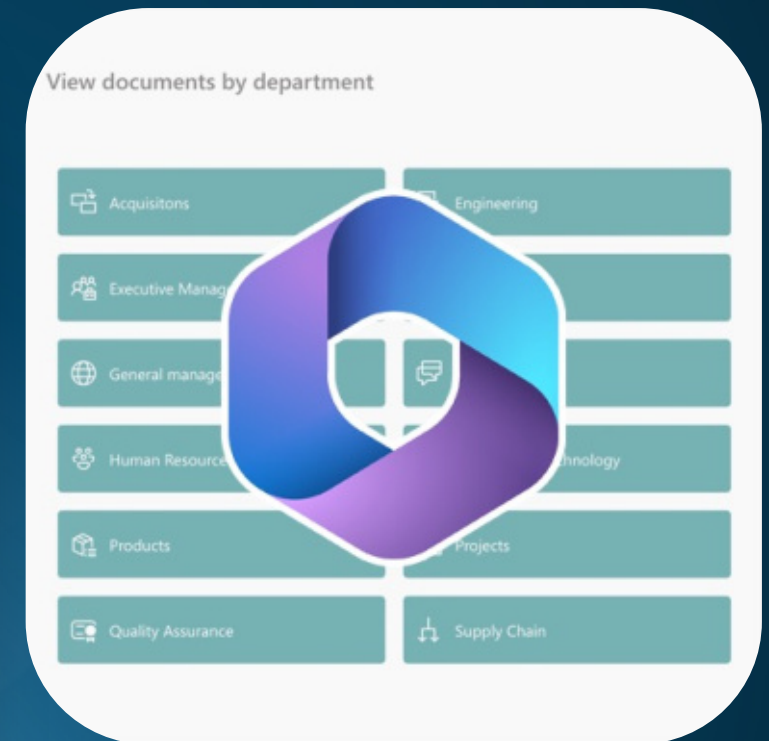

- **Archive records directly** from the familiar SharePoint/Teams interface
- **Seamlessly move documents** to dedicated, secure Record Centres
- **Apply disposal or permanent preservation rules** automatically
- **Utilise AI features** to automatically add metadata to files
- **Locate archived records instantly** across the entire digital estate
- **Time-stamped history** of every record's movement and access
- **Captures context automatically** to improve future record retrieval
- **Supports IMP06 and BS 10008 standards**
- **Accessible design** following government digital service standards
- **Data remains within your secure UK-based Microsoft tenancy**

Konsolute Records Manager: Simplify, Automate and Streamline Records Management for Microsoft 365

Benefits of this product

- **Makes record-keeping effortless** for every-day staff
- **Ensures compliance** with the Public Records Act
- **Protects sensitive records** in restricted, governed environments
- **Automation replaces unreliable manual document filing processes**
- **Leverage existing SharePoint capabilities** for enterprise records management
- **Scalable architecture** for long-term digital preservation and archiving
- **Integrates with document libraries** within existing Microsoft menus
- **Define records management workflows** for your records
- **Define final destruction** of record processes

Konsolute Reflekt:

Microsoft 365 Governance and Lifecycle Automation

Streamline Information Assurance and data governance with Konsolute Reflekt. This tool automates Microsoft 365 lifecycle processes, managing Teams, SharePoint, and Groups from creation to archive. By implementing intelligent templating and compliance guardrails, it reduces digital sprawl, secures Official-Sensitive data, and ensures your digital workspace remains tidy, secure, and fully compliant

Konsolute Reflekt: Microsoft 365 Governance and Lifecycle Automation

Features of this product

- **Automated lifecycle management** for Teams, SharePoint, and Groups
- **Intelligent templating** for consistent Information Architecture and governance
- **Self-service provisioning** with customisable approval workflow triggers
- **Automated archival and deletion** policies for inactive content
- **Sensitivity labelling integration** for Official-Sensitive data protection
- **In-depth governance auditing** and real-time compliance reporting
- **Naming convention enforcement** across all Microsoft 365 workloads
- **Ownership reviews** and automated access management certification
- **Granular external sharing** controls and guest access monitoring
- **Centralised administration** dashboard for cross-tenant governance visibility

Konsolute Reflekt: Microsoft 365 Governance and Lifecycle Automation

Benefits of this product

- **Reduces digital sprawl** by automating Teams and Site decommissioning
- **Eliminates manual administration** through automated provisioning workflows
- **Strengthens compliance** via standardised governance and audit trails
- **Minimises security risk** by enforcing Official-Sensitive handling rules
- **Increases operational efficiency** with self-service user request portals
- **Optimises storage costs** by removing redundant or obsolete data
- **Improves data findability** through structured Information Architecture templates
- **Protects intellectual property** via controlled external collaboration guardrails
- **Speeds up deployment** of secure departmental digital workspaces
- **Ensures data sovereignty** through region-specific governance policy application

Konsolute: Incident Reporting and Management System (IMS) for Microsoft 365

Empower your workforce to build a proactive safety culture. Konsolute IMS moves beyond simple data entry to drive meaningful learning from every event. Achieve total visibility of organisational risk, protect your people through rapid response, and ensure legal peace of mind with integrated, automated HSE compliance and RIDDOR reporting

Konsolute: Incident Reporting and Management System (IMS) for Microsoft 365

Features of this product

- **Staff log near-misses instantly** via simple, accessible digital forms
- **Ensures consistent data quality** across complex, multi-site government departments
- **Instantly triggers support workflows** for affected staff and stakeholders
- **Systematic tracking** ensuring every safety concern results in action
- **Automatically maps incident data** to UK safety reporting requirements
- **Identifies and shares safety lessons** to prevent incident repetition
- **Provides leadership with high-level summaries** of organisational risk
- **Uses historical data** to justify safety investments and changes
- **Supports open, blame-free reporting and transparent, fair investigations**
- **Integrates with Microsoft 365**

Konsolute: Incident Reporting and Management System (IMS) for Microsoft 365

Benefits of this product

- **Reduces workplace injuries** by identifying hazards before they escalate
- **Guarantees timely compliance** with RIDDOR and HSE statutory obligations
- **Increases trust** as staff see reports lead to change
- **Minimises service downtime** by resolving root causes quickly
- **Demonstrates high standards** of accountability and transparency
- **Embeds a cycle of continuous learning** into organisational DNA
- **Maximise value** from your current Microsoft 365 licensing
- **Integrates safety data** with your broader organisational digital estate
- **No new third-party databases** or complex infrastructure to manage
- **Delivers a modern, accessible interface** that civil servants expect

Konsolute: ISO Certified Quality Management System (QMS)

Implement a robust, ISO-certified Quality Management System tailored for Microsoft 365. Our solution enables government organisations to manage, track, and audit compliance standards with ease. By integrating document lifecycle management and real-time reporting dashboards, we help you maintain regulatory alignment, improve operational quality, and ensure Information Assurance across your organisation

Konsolute: ISO Certified Quality Management System (QMS)

Features of this product

- **Integrated compliance management** for key ISO standards
- **Comprehensive document lifecycle and version control** management
- **Dynamic dashboards** providing real-time compliance oversight
- **Automated auditing** and proactive compliance tracking workflows
- **Seamless integration** with existing Microsoft 365 applications
- **Custom standard incorporation** tailored to departmental needs
- **Clause management** aligned with specific organisational requirements
- **Risk assessment modules** and automated action plan implementation
- **Enhanced data protection** using sensitivity and retention labelling
- **Preloaded ISO libraries** featuring the latest international standards

Konsolute: ISO Certified Quality Management System (QMS)

Benefits of this product

- **Ensures continuous compliance** with international ISO standards
- **Streamlines quality management** through automated digital workflows
- **Reduces administrative burden** via automated compliance tracking
- **Improves document control** and Information Assurance security
- **Facilitates easier audits** with ready-to-export digital reports
- **Supports continuous improvement** through real-time quality insights
- **Centralises quality management** within a single Microsoft platform
- **Enhances operational visibility** over departmental compliance activities
- **Ensures data sovereignty** by keeping information on your tenant
- **Minimises human error** in regulatory compliance management
