

GCloud 15 Lot 3 Services

Experts in Cloud Engineering Service Design & Data and AI

We are an ISO27001, ISO9001, ISO14001 and Cyber Essentials Plus certified **Scottish-based company** that delivers user-centric software solutions, driving digital transformation for public and private sector clients. Our expertise includes citizen-centric service design, digital transformation projects, data management, cloud architectures, artificial intelligence and software development.

Our experience and deep understanding of the public sector with a particular expertise in digital service standards makes us a trusted partner for government agencies and organisations seeking to enhance their digital services.

Ember are always trying to push the boundaries of technology and of what's feasible and what's possible. That's an attitude I love. I love pushing the boundaries of what's possible and never settling for 'good enough'

AI Compliance and Strategy

AI Compliance and Strategy

How we can help

Public sector organisations are under increasing pressure to adopt artificial intelligence while complying with complex regulatory, ethical and governance requirements.

Many lack clear oversight of how AI is being used, who is accountable for decisions and how risks such as bias, transparency, data protection and complex algorithms are managed.

Without structured governance, organisations face heightened legal, reputational and operational risk when deploying AI within live services.

We provide operational AI compliance and governance support that enables organisations to adopt AI safely within live services.

Our service establishes clear accountability, risk controls and assurance processes aligned to public sector obligations.

We help organisations embed compliant AI practices into day-to-day operations, reducing risk while enabling innovation and responsible use of AI technologies.

Our AI Compliance and Strategy services

- Audit existing AI use cases and decision points
- Identify data sources and model dependencies
- Map regulatory and policy obligations
- Assess bias, fairness and ethical risks
- Define AI governance roles and ownership
- Establish approval and escalation controls
- Document compliance and assurance evidence
- Align AI use with organisational standards
- Define monitoring and review processes
- Provide ongoing compliance advisory support

AI Compliance and Strategy services

We deliver a comprehensive AI governance discovery aligned to the Government Digital Service Standard. This includes an assessment of your organisation's data maturity, cloud readiness, ethical and regulatory risk and user needs. We translate these insights into clear, actionable recommendations and a prioritised roadmap that enables responsible AI adoption, robust governance, regulatory compliance, and secure, scalable delivery.

Features

- Discovery aligned with Government Digital Service Standard
- AI governance assessment and guidance
- Ethical, legal, and policy considerations addressed
- AI model assessments and recommendations
- GDPR compliance ensured
- Roadmap and next steps guidance
- Review of organisation AI culture, architecture and processes
- Focus on AI ethics importance, including guardrails
- Facilitated Knowledge Transfer to internal teams

Benefits

- Context-specific recommendations for people, processes and technology
- Assessment of available AI products and services suitability
- AI Safety strategy including guardrails, monitoring and ethical testing
- AI adoption roadmap creation for future investment and digital transformation
- Guidance on legal, policy constraints, and GDPR compliance
- Informed decision-making on AI readiness discovery progression
- Key AI strategy assessments in futureproofed AI architectures
