

Chrome Enterprise Premium (CEP) Zero Trust Security Pilot & Deployment Service

Pilot and deploy Chrome Enterprise Premium rapidly. Includes pilot delivery, technical support and success criteria definition. Validates hardware compatibility, application interoperability and security features (DLP, Context-Aware Access), before procurement. We architect Zero-Trust environments by integrating Identity Providers, configuring DLP and deploying Endpoint Verification, to transform the browser into your strong defensive line.

Features

- ▶ Official **CEP Jump Start** deployment methodology.
- ▶ Integration with IdPs (Okta, Ping, Google, Azure AD).
- ▶ Zero Trust architecture and Context-Aware Access rules.
- ▶ Data Loss Prevention (DLP) policy design and tuning.
- ▶ Endpoint Verification for device trust assessment.
- ▶ Threat and Data Protection reporting configuration.
- ▶ Malware and phishing protection policy setup.
- ▶ Security Insights dashboard and forensic logging.
- ▶ Shadow IT discovery and control.
- ▶ Knowledge transfer to the Security Operations Centre (SOC).

Benefits

- ▶ Accelerates Zero Trust adoption via proven methodology.
- ▶ Mitigates insider threats and data exfiltration risks.
- ▶ Enables secure BYOD without managing the whole device.
- ▶ Provides granular visibility into browser-based activity.
- ▶ Reduces dependency on traditional VPNs.
- ▶ Supports compliance with GDPR/ISO27001 data controls.
- ▶ Unifies security policy across managed/unmanaged devices.
