

Google Workspace Migration & Technical Consolidation

Migration service to consolidate users and data from legacy environments (O365, Exchange, On-premise) into Google Workspace. We manage the full lifecycle: discovery, technical design, data migration (Mail, Drive, Calendar), identity synchronisation and post-migration support to ensure data integrity.

Features

- ▶ Project-managed migration from O365/Exchange to Google Workspace.
- ▶ Tenant-to-Tenant Cloud migration paths.
- ▶ Automated migration of Mail, Drive, Calendar and Contacts.
- ▶ Identity management (GCDS) and SSO configuration.
- ▶ Change management, comms planning and user guides.
- ▶ Data integrity validation and reconciliation reporting.
- ▶ Post-migration **Hypercare** support and snagging.
- ▶ Cutover management to minimise business downtime.
- ▶ Legacy archive data extraction and ingestion.
- ▶ DNS and mail routing configuration (SPF, DKIM, DMARC).

Benefits

- ▶ Minimises operational downtime during critical transition periods.
- ▶ Ensures data sovereignty and integrity compliance with GDPR.
- ▶ Retires expensive legacy on-premise hardware and licensing.
- ▶ Centralises data management for improved compliance/governance.
- ▶ Seamless user transition with managed change comms.
- ▶ Scalable methodology suitable for SMEs to Enterprise.
- ▶ Reduces risk of data loss via validated transfer tools.
