

Google Workspace Domain Security & Advanced Audit Service

Deep-dive forensic analysis of your Google Workspace environment. We examine admin roles, MFA enforcement, data-sharing settings (Drive/Calendar) and mail-flow security (DMARC/SPF). Includes a comprehensive risk report with a prioritised action plan and an on-site implementation workshop to assist ISO/GDPR compliance.

Features

- ▶ Comprehensive audit of Admin Console security settings.
- ▶ Identity & Authentication review (MFA, 2SV, Password Policy).
- ▶ Data exposure analysis (External Drive Sharing, Groups).
- ▶ Mail security verification (SPF, DKIM, DMARC, Spoofing).
- ▶ Third-party application access (OAuth) review.
- ▶ Storage consumption and licence utilisation analysis.
- ▶ Mobile Device Management (MDM) policy review.
- ▶ Offboarding process and suspended user analysis.
- ▶ Detailed risk report with prioritised remediation steps.
- ▶ On-site implementation workshop and strategic roadmap.
- ▶ Identification of **Shadow AI** usage and unsanctioned Large Language Model access.

Benefits

- ▶ Identifies critical security vulnerabilities for immediate fix.
- ▶ Ensures alignment with NCSC and GDPR compliance.
- ▶ Optimises licensing costs by identifying unused accounts.
- ▶ Reduces risk of data leakage via external sharing.
- ▶ Cleans up **Shadow IT** (unauthorised 3rd party apps).
- ▶ Provides independent assurance for stakeholders/auditors.
- ▶ Establishes a secure baseline for future growth.
