

Advanced Data Analytics & Business Intelligence Service

Quick Guide - Service Specification

Our advanced analytics platform complements our Attendance, Attainment and Personal Education Plan (PEP) services, offering powerful insights through a growing suite of dashboards. It allows users to review data through easy-to-understand visualisations, covering a mix of strategic, operational, and individual child-level perspectives. All dashboards are updated daily with live data from attendance records and PEP updates and are fully filterable, enabling you to monitor and investigate all your data in one place at any time.

By using the platform, you can identify emerging trends and patterns, enabling informed decision-making that positively impacts the lives of vulnerable children. It puts actionable insights at your fingertips, supporting strategic planning, operational efficiency, and targeted interventions for children who need it most.

Why a live demonstration?

Safeguarding isn't a checkbox – it's a responsibility

On paper we may look like other providers.

But in a live walkthrough, you'll see how we go beyond compliance – to real, proactive safeguarding for young people.

Safeguarding is too important to judge from a profile. In our demo, we'll walk you through:

- How our service actually works for your specific needs
- How we help you act early – not just react
- The tools and support we provide to protect young people
- You'll be able to ask questions, get clarity – no vague promises
- Understand the difference between "standard" and what we actually deliver

Book a live walkthrough with our team at bidmanagement@welfarecall.com

About This Quick Guide

This Quick Guide provides contracting authorities with a concise, high-level overview of our service.

Further detail, including comprehensive guidance and practical information, is available in our In-Depth Guide, which can be provided on request.

We can also arrange a short introductory discussion or a service demonstration to support your understanding.

Please refer to Page 5 for next steps.

360 Solution

Attendance & Attainment

Fully managed data collection and analysis service (cloud-based solution) covering attendance, attainment, progress, safeguarding and consultancy for monitoring and improvement of outcomes for vulnerable cohorts including but not limited to; Children in Care (CiC/CLA/LAC), Children in Need (CiN), those on Child Protection (CP), those with a Social Worker, those with EHCP/SEN plans and Youth Justice.

Electronic Personal Education Plan

Intuitive, bespoke and secure cloud-based ePEP platform to assist Local Authorities, Virtual Schools and other key stakeholders in improving educational outcomes for vulnerable cohorts. Our ePEP is procured by 60+ Authorities and improves both the quality and quantity of Personal Education Plans for Looked After and Vulnerable Children.

Data Analytics & Business Intelligence

A data analytics and business intelligence service that supports Local Authorities and Virtual Schools in monitoring and improving outcomes for vulnerable children. Through a comprehensive suite of dashboards and reports (covering attendance, attainment, progress, PEP data), the service provides actionable insights on a pupil, cohort and whole school level.

Safeguarding, Consultancy & Managed Services

We provide expert safeguarding consultancy and a fully managed support service, working as a trusted extension of your team from day one. With education and virtual school expertise, dedicated account management, tailored training, and one-to-one support, you can be confident you're in safe hands.

Core Services

Data Analytics & Business Intelligence Service

Data Analytics - Advanced

Reflecting and analysing data is enhanced through our Advanced Analytics Platform, hosting over 40 dashboards and 400 service-dependent sub-dashboards. Powered by Sisense, a market-leading BI and analytics tool, it is purpose-built for Virtual Schools.

The platform makes complex data easy to interpret, turning attendance, attainment, and education plan data into clear, actionable insights. Dashboards span strategic, operational, and individual child-level views, with live daily updates from attendance marks and PEPs, all fully filterable.

All data can be monitored and investigated in one place at any time, with alerts to flag emerging trends quickly. This enables partners to identify patterns early, respond effectively, and make informed decisions that positively impact the lives of vulnerable children.
