

GenOps.AI

GenOps.AI: Infra, security, app monitoring and managing cloud platform

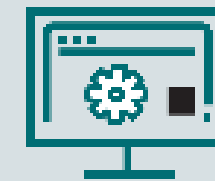

**Monitoring and
Troubleshooting**

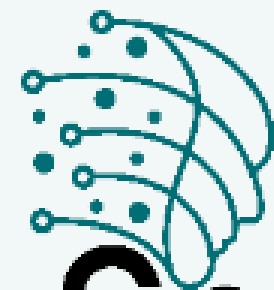

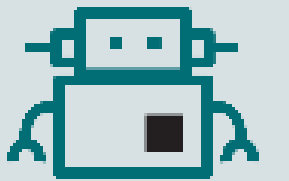

**Incident
management &
SOP Generation**

**Root cause
analysis**

Automation

GenOps.AI
Zero Human, All Machines

Orchestrating Intelligent Agents

Our agentic system leverages a powerful combination of FastAPI and LangGraph. This foundation provides a robust, asynchronous API backbone for seamless interaction and sophisticated multi-agent workflow orchestration.

FastAPI

High-performance,
async API development.

LangGraph

Enables complex,
stateful multi-agent interactions

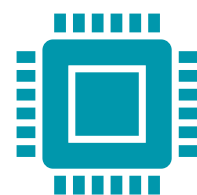

VALUE AND BENEFITS TO CLIENTS (AND BUSINESS OUTCOME)

Solution and Benefits:

- **Operational Efficiency:** Focuses on automation, incident response, and RCA improvements.
- **Scalability & Flexibility:** Highlights modular architecture, LLM support, and deployment options.
- **Speed & Agility:** Covers fast implementation, alert suppression, and dynamic runbooks.
- **Governance & Compliance:** Includes SOP lifecycle, security, and audit-readiness.
- **Client-Specific Outcomes:** Showcases real-world impact across industries like finance, semiconductor, and retail.

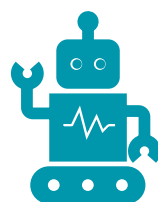

DIFFERENTIATORS FROM COMPETITORS

Why choose UST?

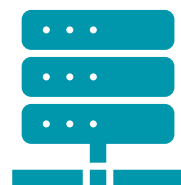

Agentic Architecture & Orchestration

Multi-agent orchestration,
Human in the Loop

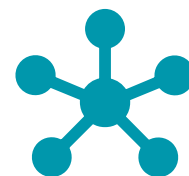

LLM-Agnostic & Tech Stack Flexibility

Compatible & Seamless Integration

Zero-Touch Operations

Fully automates L1 support

SOP Lifecycle Automation

Automatically generates SOPs

Integrated Monitoring & ITSM Automation

Ingests alerts from tools like Zabbix, Logic Monitor, Dynatrace, and integrates with ServiceNow, BMC etc.

Governance & Accuracy Tracking

Maintains accuracy thresholds

Deployment & Hosting Flexibility

Supports cloud and on-prem deployments
