Pricing Overview

SynkRhino AI is offered as a single subscription-based service designed to deliver end-to-end, AI-powered data pipeline automation. The pricing includes access to the full multi-agent platform, orchestration, automation capabilities, and standard support. The service can be deployed either within the customer's existing cloud subscription or on cloud and AI services procured based on customer requirements.

Annual Service Cost:

£22,000 GBP

This pricing is designed to provide predictable costs and transparent value, enabling rapid data pipeline delivery with reduced engineering effort and faster time to insight.

Pricing Details

The £22,000 GBP subscription includes:

- Access to the SynkRhino AI platform and multi-agent architecture
- AI-driven data profiling, transformation, and PySpark code generation
- Workflow orchestration and monitoring
- Data quality validation and analytics capabilities
- REST API access and management interface
- Standard onboarding support and documentation
- Standard maintenance and platform updates

Not Included / Additional Costs:

- Cloud infrastructure usage (compute, storage, networking)
- AI model consumption (e.g., Groq, OpenAI, Azure OpenAI)
- Third-party tool licenses, data egress, or premium support
- Custom development, migration assistance, or extended support

Note: Any tools mentioned other than the SynkRhion AI framework will need to be procured or licensed separately.

All additional services are scoped, estimated, and priced separately through a formal change or enhancement request process.
