Pricing Overview

The pricing for MDDI (Metadata-Driven Data Integration) is designed to provide customers with an enterprise-ready, reusable data pipeline framework at a predictable and transparent cost. This pricing covers access to the core MDDI capabilities, including automated ingestion, validation, standardization, orchestration, and telemetry across hybrid and cloud data platforms. MDDI enables rapid onboarding of new data sources and targets while significantly reducing development and BAU effort. The proposed pricing is a fixed fee, ensuring cost certainty with no hidden charges for standard usage within the agreed scope.

Pricing Details

Total Contract Cost: £22,000 GBP

Included in Pricing:

- Access to the MDDI reusable framework and templates
- Metadata-driven pipeline configuration (table-based or JSON recipes)
- Data ingestion from databases, files, on-premise, and cloud sources
- Event-based and scheduled acquisition using triggers
- Validation, data standardization and enrichment
- Orchestration of end-to-end pipelines
- Telemetry, logging, and audit trail enablement
- Support for Data Lake, Lakehouse, Delta Lake, and Data Warehouse targets
- Documentation and standard onboarding / knowledge transfer

Additional Costs (If Required):

- Custom connectors or non-standard source integrations
- Advanced data quality frameworks or bespoke transformations
- Extended support, SLAs, or operational run support
- Cloud infrastructure, compute, and data egress costs

This pricing delivers a scalable, automation-first ingestion foundation while allowing flexibility for future expansion. All additional services are scoped, estimated, and priced separately through a formal change or enhancement request process.

Note: Any tools mentioned other than the * framework will need to be procured or licensed separately.
