Pricing Overview

The Data Quality Framework (DQF) is offered under a transparent, fixed price commercial model. The pricing covers framework usage, core capabilities, and standard operational support, enabling customers to implement automated data quality validations with predictable cost and no hidden fees.

The base price for DQF is **£22,000 GBP**, applicable per contract period as agreed (e.g., annual subscription or project engagement). This pricing is designed to deliver measurable reductions in validation effort, cost, and time to market through automation and configuration driven execution.

Optional addons and custom services can be engaged separately based on customer requirements.

Pricing Details

Included in the £22,000 GBP Price

- Access to the Data Quality Framework (DQF) platform
- Config driven data quality validations (Template based)
- Multistage validation coverage (migration, ETL/ELT, production)
- Multilevel aggregation and reconciliation checks
- Integration with supported databases, files, and APIs
- Realtime reporting and standard dashboards
- Standard support during agreed business hours
- Documentation and knowledge transfer materials

Additional Chargeable Items

- New feature development or major enhancements
- Custom integrations outside standard connectors
- Advanced or customer specific validation logic
- Extended support hours (12x5 or 24x7 coverage)
- Dedicated Technical Account Manager or cloud engineer
- Largescale performance tuning or rearchitecting

All additional services are scoped, estimated, and priced separately through a formal change or enhancement request process.

Note: Any tools mentioned other than the DQF will need to be procured or licensed separately.
